

AGENTIC AUTOMATION

BOTEYE: PORT & LOGISTICS OPERATIONS

Revolutionizing terminal efficiency through autonomous AI agents that reason,
coordinate, and act in real-time.

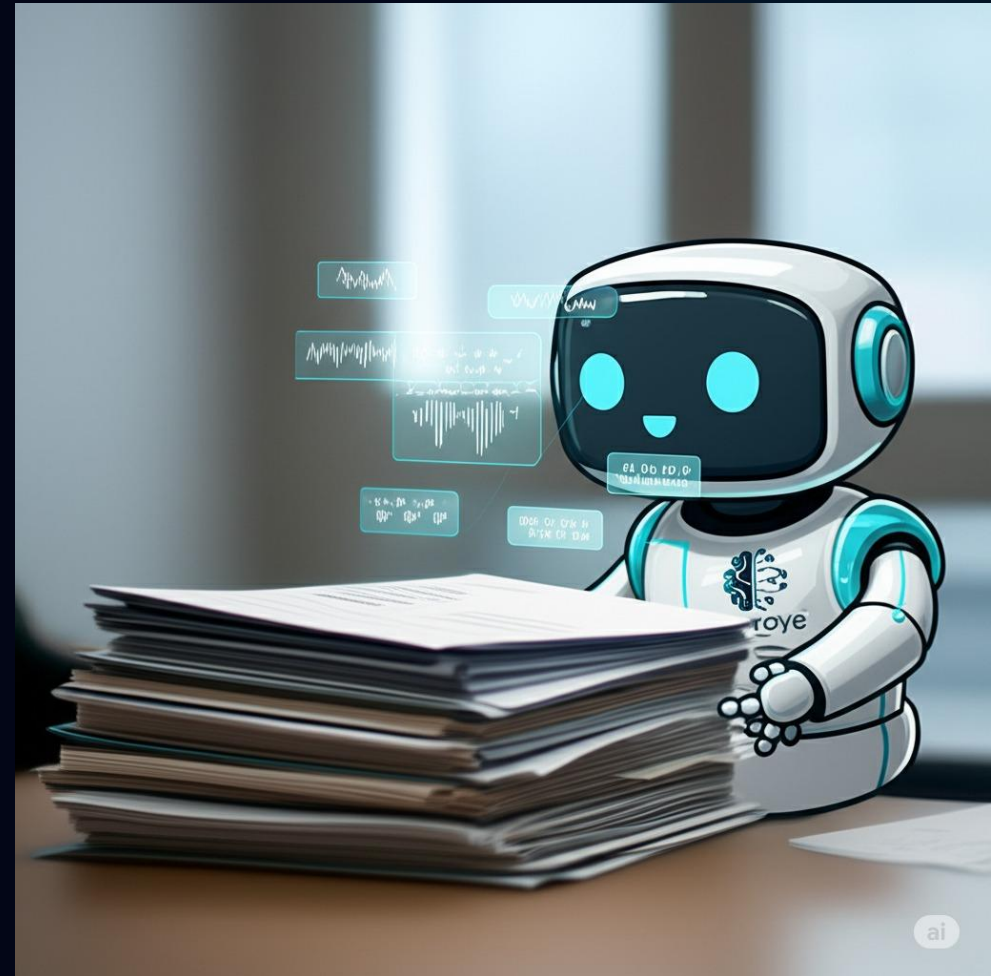

FUTURE OF LOGISTICS

CUSTOMS & DOCUMENTATION

BOTeye agents don't just extract data; they **reason** through complex logistics documentation.

- ✔ Reads, verifies, and uploads data from scanned PDFs.
- ✔ Autonomously resolves discrepancies (e.g., misspelled names vs Tax IDs).
- ✔ Ensures **100% compliance** without manual human verification steps.

INTELLIGENT EXCEPTION MANAGEMENT

AUTO-RECALCULATION

When delays occur at Jebel Ali, BOTeye autonomously recalculates arrival times and yard availability.

DIRECT NOTIFICATION

Instantly notifies customers and drivers via WhatsApp with updated routing instructions.

ERP SYNCHRONIZATION

Updates internal schedules and SAP/Oracle records before your team even notices the issue.

SUPPLIER & VENDOR COORDINATION

BOTeye acts as a **24/7 digital coordinator**, ensuring the "Port-to-Door" flow never stops.

It autonomously chases missing information from partners, verifies vessel status, and manages berth allocation based on real-time ETA changes.

AGENTIC PORT/ LOGISTICS OPERATIONS

Revolutionizing terminal
efficiency through
autonomous AI agents that
reason, coordinate, and act
in real-time.

HS CODE & CUSTOMS REASONING

THE MANUAL COST

Logistics firms spend thousands of hours manually classifying goods. Human error leads to massive fines and shipment delays.

THE BOT EYE ADVANTAGE

Our agents "read" commercial invoices and autonomously assign correct HS codes based on global trade regulations.

WHATSAPP "ACTION" AGENTS

A LOGISTICS GAME-CHANGER

Logistics worldwide happens on WhatsApp. BOTeye captures driver updates and executes ERP commands directly from the chat.

- ✔ Reads driver messages for gate status.
- ✔ Updates SAP/Oracle via API in real-time.
- ✔ Triggers yard crane operations automatically.

UNRIVALED SCALABILITY

10

Volume Capacity

X

PEAK PERFORMANCE READY

Handle 10x the standard transaction volume during Ramadan or White Friday shopping peaks without increasing headcount.

The AI agent scales instantly to manage surges in customs documentation and truck gate coordination.

FULL TERMINAL ORCHESTRATION

TRUCK GATES

Automated entry & scheduling

QUAY OPERATIONS

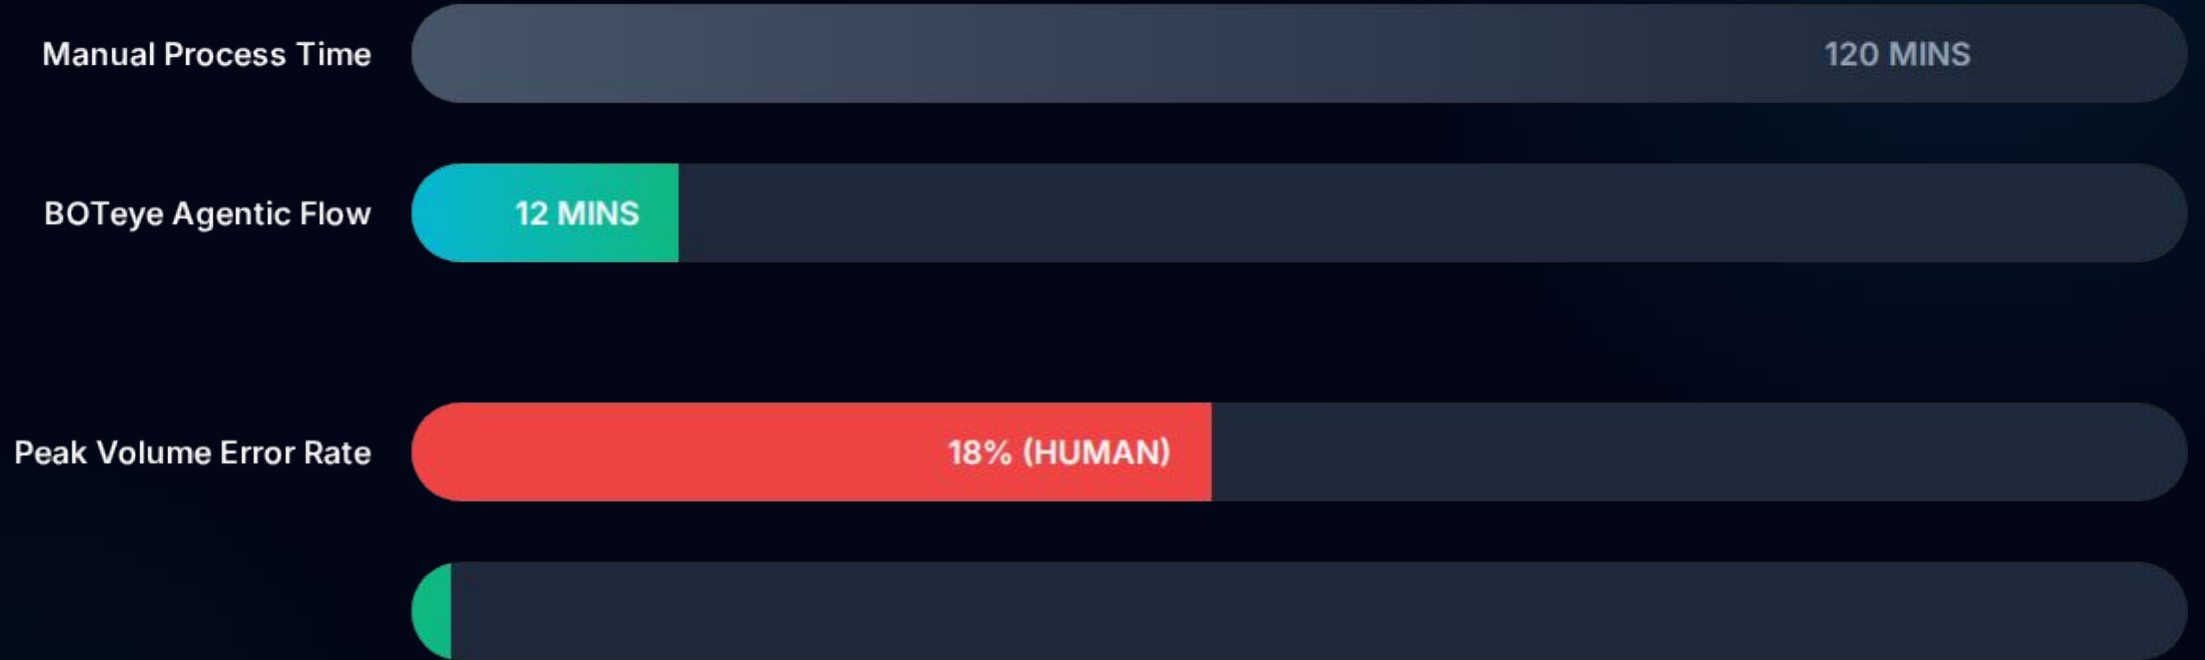

Berth & crane coordination

YARD LOGIC

Congestion anticipation

EFFICIENCY GAIN COMPARISON

**Data based on simulated high-peak logistics documentation processing.*

DEPLOYMENT ROADMAP

PHASE 1

Agent Logic Training &
Documentation Ingestion

PHASE 2

Integration with WhatsApp
& ERP (SAP/Oracle)

PHASE 3

Live Pilot: Customs & HS
Code Reasoning

PHASE 4

Full Autonomous Terminal
Orchestration

NEXT STEPS

Are you ready to move your port operations into the age of
Agentic Autonomy?
