

Computer Security Scientist (Senior)

Location: Aberdeen Proving Ground, MD

Type: Full Time **Minimum Experience:** 7 years within the last 10 years

Summary

Kersh Information Technology Services (KITS) is a Korean American economically disadvantaged women owned small business, currently has an opening for a **Computer Security Scientist** to join our team in Aberdeen Proving Ground, Maryland.

Responsibilities and Duties

- Must be capable of acting as the principal technical advisor to the Project Manager on issues pertaining to computer security.
- Must understand the National and DoD policies that affect the security of computer systems.
- Must understand the software development process and of the properties of software. Must understand computer architectures and operating system concepts.
- Must have the ability to select and apply relevant security requirements to systems in development and in their fielded environment.
- Must have the ability to organize protective mechanisms into realizable components of a secure system architecture.
- Must be capable of developing and executing plans for functional and penetration testing.
- Must be a recognized expert as demonstrated by presentation papers at National and/or DoD computer security symposia and conferences, or by publication in nationally recognized professional journals. As a recognized expert in the field, must be capable of representing the customers' computer security issues at meetings and conferences.

Required Qualifications and Skills

Education Level and Degree Required: PhD in Scientific or Engineering discipline.

Security Clearance: TOP SECRET SCI

Minimum Years of Relevant Experience: 7 years within the last 10 years

Substitution for Degree: A Master's Degree in a scientific or engineering discipline and an additional three (3) years (for a total of ten (10) years) computer software security experience may be substituted for the PhD.

Company Description

Kersh Information Technology Services (KITS) is a Korean American economically disadvantaged women owned small business (EDWOSB) with over 20 years of experience in the Information Technology (IT) industry based out of Delaware providing IT Consulting, Systems Engineering, Field Support Engineering, and Program Management Services to the Department of Defense (DoD) and corporations within the DoD industry. Our services focus on the direct needs of both our government and corporate clients. KITS

specialize in the systems engineering, integration, architectural system implementation, field support, and program management of Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) systems.

KITS is a proud member of the following organizations: National Association of Asian American Professional, Korean American IT Association, Korean Professional Women's Association, Korean Business Network, and Korean American Women in Science and Engineering.

Information Security Engineer (Intermediate)

Location: Aberdeen Proving Ground, MD

Type: Full Time **Minimum Experience:** 2 years within the last 4 years

Summary

Kersh Information Technology Services (KITS) is a Korean American economically disadvantaged women owned small business, currently has an opening for an **Information Security Engineer** to join our team in Aberdeen Proving Ground, Maryland.

Responsibilities and Duties

- IASAE Level I personnel are responsible for the design, development, implementation, and/or integration of a DoD IA architecture, system, or system component for use within their Computing Environment (CE).
- Ensure that IA related IS will be functional and secure within the Computing Environment (CE).
- DoD 8570.01-M spells out the tasks and duties in detail and the DFARS stipulates compliance with the DoD 8570.01-M.
- Must have a working knowledge of the functions spelled out in Table C10.T3.
- IASAE Level I Functions in DoD 8570.01-M.

Required Qualifications and Skills

Education Level and Degree Required: Bachelor's Degree Computer Science, or other Engineering or Technical discipline with an Information Security or Cyber Security Concentration.

Security Clearance: TOP SECRET SCI

Minimum Years of Relevant Experience: 2 years within the last 4 years

Certifications

- Five years of professional experience, appropriate computing environment certification, and Information Assurance (IA) SYSTEM ARCHITECT AND ENGINEER (IASAE) SPECIALTY qualified in accordance with standards spelled out in DoD 8570.01-M and the Army Information Assurance (IA) Training and Certification Best Business Practice, corrected 6 Aug 2010.
- Experience can substitute for the degree provided the person has BOTH the relevant experience AND is fully Information Assurance (IA) certified in accordance with AR 25-2, Information Assurance, and the associated best business practice for IA Training and certification (IA Training BBP).

Company Description

KITS is a proud member of the following organizations: National Association of Asian American Professional, Korean American IT Association, Korean Professional Women's Association, Korean Business Network, and Korean American Women in Science and Engineering.

Information Security Engineer (Senior)

Location: Aberdeen Proving Ground, MD

Type: Full Time **Minimum Experience:** 9 years within the last 15 years

Summary

Kersh Information Technology Services (KITS) is a Korean American economically disadvantaged women owned small business, currently has an opening for an **Information Security Engineer** to join our team in Aberdeen Proving Ground, Maryland.

Responsibilities and Duties

- IASAE Level III positions are responsible for the design, development, implementation, and/or integration of a DoD IA architecture, system, or system component for use within Computing Environment (CE), Network Environments (NE), and enclave environments.
- Ensure that the architecture and design of Department of Defense (DoD) Information Systems (IS) are functional and secure. This may include designs for program of record systems and special purpose environments with platform IT interconnectivity.
- Responsible for system or network designs that encompass multiple CE and/or NE to include those with differing data protection/classification requirements.
- DoD 8570.01-M spells out the tasks and duties in detail and the DFARS stipulates compliance with the DoD 8570.01-M.
- Must have a working knowledge of the functions spelled out in Table Table C10.T7.
- IASAE Level III Functions in DoD 8570.01-M.

Required Qualifications and Skills

Education Level and Degree Required: Bachelor's Degree Computer Science, or other Engineering or Technical discipline with an Information Security or Cyber Security Concentration.

Security Clearance: TOP SECRET SCI

Minimum Years of Relevant Experience: 9 years within the last 15 years

Certifications

- Twelve years of professional experience, appropriate computing environment certification, and IA SYSTEM ARCHITECT AND ENGINEER (IASAE) SPECIALTY qualified in accordance with standards spelled out in DoD 8570.01-M and the Army Information Assurance (IA) Training and Certification Best Business Practice, corrected 6 Aug 2010.
- Experience can substitute for the degree provided the person has BOTH the relevant experience AND is fully Information Assurance (IA) certified in accordance with AR 25-2, Information Assurance, and the associated best business practice for IA Training and certification (IA Training BBP). Network Engineer (Senior)

Location: Aberdeen Proving Ground, MD

Type: Full Time **Minimum Experience:** 9 years within the last 15 years

Summary

Kersh Information Technology Services (KITS) is a Korean American economically disadvantaged women owned small business, currently has an opening for a **Network Engineer** to join our team in Aberdeen Proving Ground, Maryland.

Responsibilities and Duties

- Must be capable of performing network engineering functions including conceptualization, design, implementation, and optimization.
- Must be experienced in assessing evolving user needs, translating those needs into network changes through network reconfiguration, hardware and software acquisitions, installation and test.
- Must be knowledgeable in the application of current and emerging network software and hardware technology and protocols.
- Solve engineering problems (or managing the solution of engineering problems) in the functional area to which assigned.

Required Qualifications and Skills

Education Level and Degree Required: Bachelor's Degree Computer Science, Mathematics, or other Engineering or Technical discipline.

Security Clearance: TOP SECRET SCI

Minimum Years of Relevant Experience: 9 years within the last 15 years

Cyber Security Requirements

IA Technical Level: IAT-2

Personnel Security Stds: IT-I

Position Sensitivity Designation: Noncritical-sensitive (ADP-II)

Federal Investigative Stds: TIER 5
