

## Model Requirements

We follow a program structure where students in this course will be required to provide their own models. In the event we have an even number of students, we also have the option to work on each other. This will be determined and noted by your trainer at least 7 days prior to your training. If you cannot obtain a model, you are required to notify your trainer at least 7 days prior so we can locate one for you. Sourcing an ideal model for your training will certainly set you off on the right track.
