

DataHaven

SOLUTIONS

DevOps Engineer - Mid/Senior

RESTON/DULLES AREA

DataHaven Solutions is looking for Mid and Senior level DevOps Engineers to join our team in Northern Virginia. This work will be performed at client sites in the Reston/Dulles area, and requires a TS/SCI with polygraph. If you feel compelled to automate, instrument, and monitor things, then this is the job for you:

WHAT YOU'LL DO:

- Develop and maintain automated build and continuous integration systems
- Bring order to the mess that developers create when they're left to themselves with infrastructure ;)
- Use the latest cloud, automation, continuous integration, and container technologies
- Design a secure infrastructure using AWS security groups, firewall configurations, and SSL/public key infrastructure

TASKS YOU MIGHT WORK ON:

- Develop Ansible playbooks to deploy web applications and proxy servers
- Configure a CI server to build and automatically deploy a Node-based Web application to a test environment
- Develop Terraform code for auto-scaling server clusters
- Create custom AMIs with Packer
- Work with developers to containerize existing applications using Docker
- Configure Secure Linux in a cloud environment to ensure we have a compliant and secure infrastructure

WHY WE SHOULD TALK:

- You get excited about DevOps technologies like Ansible, Docker, Cloudflare, AWS, nginx, PKI, etc.
- You have a technical degree and at least 4 years of solid experience in development, infrastructure management, and operations support.
- You want to work in a lively yet laid-back environment full of people who love learning.
- You want to work on stuff that matters to mission
- This position requires an active TS/SCI clearance
