

DataHaven

SOLUTIONS

Software Engineer

FT. MEADE AREA

DataHaven Solutions is looking for Software Engineer to join our team in Maryland. This work will be performed in the Ft. Meade area. If you are looking to advance your career to the next level all while working for a small company that treats you more like family than a number, this may be the job for you:

WHAT YOU'LL DO:

- Design, develop, test, and maintain production-level enterprise applications deployed to cloud infrastructure
- Extend open-source libraries and systems as necessary to meet the needs of the team
- Design and implement functionality that spans from storage to middleware to browser
- Create interactive Web-based user interface components and data visualizations
- Work closely with customers and teammates to rapidly build, test, and deploy new capabilities
- Work on an important tool used by tens of thousands of people
- Work on a small team where you can easily expand your skill set and grow your career

TASKS YOU MIGHT WORK ON:

- Add new functionality to our Angular.io, Node.js, and MongoDB web application
- Extend our Apache NiFi data processing pipeline and Elasticsearch data storage layer
- Develop our data management platform built on Scala and Akka
- Help monitor and maintain our infrastructure deployed to AWS and OpenStack

WHY WE SHOULD TALK:

- You love technology (e.g., Angular.io, Node.js, Elastic Stack, AWS, MongoDB, Apache NiFi, Ansible, and more). Knowledge and comfortability with NiFi and Java for writing custom processors is a plus.
- You have a technical degree and at least 5 years of solid experience in development, and like trying new things.
- You want to work in a lively yet laid-back environment full of people who love learning
- You want to build stuff people actually use.
- This position requires an active TS/SCI clearance
