

DataHaven

SOLUTIONS

Software Engineer – Principal

RESTON/ DULLES AREA

DataHaven Solutions is looking for Senior Software Engineer to join our team in Northern Virginia. This work will be performed at client sites in the Reston/Dulles area. If you are looking to advance your career to the next level all while working for a small company that treats you more like family than a number, this may be the job for you:

WHAT YOU'LL DO:

- Design, develop, test, and maintain production-level enterprise applications deployed to cloud infrastructure
- Extend open-source libraries and systems as necessary to meet the needs of the team
- Design and implement functionality that spans from storage to middleware to browser
- Create interactive Web-based user interface components and data visualizations
- Work closely with customers and teammates to rapidly build, test, and deploy new capabilities

TASKS YOU MIGHT WORK ON:

- Add new functionality to our Angular.io, Node.js, and MongoDB web application that allows users to analyze large data sets using text search, faceted filters, and geospatial and temporal visualizations
- Extend our Apache NiFi data processing pipeline, Elasticsearch data storage layer, and Spark analytics framework
- Develop our data management platform built on Scala and Akka
- Help monitor and maintain our infrastructure deployed to Amazon Web Services using Kibana and Elastic stack

WHY WE SHOULD TALK:

- You love technology (e.g., Angular.io, Node.js, Elastic Stack, AWS, MongoDB, Apache NiFi, Ansible, Scala, Akka, Spring.io, and more)
- You have a technical degree and at least 20 years of solid experience in development, and like trying new things.
- You want to work in a lively yet laid-back environment full of people who love learning
- You want to build stuff people actually use
- You have an active SECRET clearance or higher. Candidates with TS/SCI with polygraph are highly encouraged to apply.
