

DataHaven

SOLUTIONS

Solutions Consultant

HERNDON/ DULLES, LANGLEY, CHANTILLY, VA.

DataHaven Solutions is working directly with Databricks to provide support to customers across the IC community. We are looking for a talented Solutions Consultant. You will work on some of the most complex distributed processing and machine learning problems in the world and our customers challenge us daily with interesting new big data and AI use cases. As a Solutions Consultant supporting Databricks, you'll report to the Regional Leader of Resident Solutions Architect Team. You will shape the future big data and the machine learning landscape for leading Fortune 500 organizations.

You will be in a customer-facing role that requires deep hands-on expertise in Apache Spark™ and data engineering, along with a variety of knowledge of the big data ecosystem. You will guide our largest customers, for example implementing pipelines from data engineering through model building and deployment. A successful Solutions Consultant is curious and excels in collaboration. As part of joining Databricks, you will have a direct channel to the developers of Apache Spark™, Delta Lake, and MLflow, and the opportunity to attend top big data conferences.

Security Clearance:

A current Top Secret clearance with full-scope polygraph is required for this position.

Place of Performance:

Northern, VA.

The impact you will have:

- Guide strategic customers as they implement transformational big data projects, including end-to-end development and deployment of industry-leading big data and AI applications
- Use your expertise in data engineering best practices to guide customers to do the same, through building proofs of concept and prototypes and even pair-programming with customer teams
- Implement migration of workloads from 3rd party databases and data platforms to Apache Spark™
- Promote Apache Spark™ and Databricks, Delta Lake and MLflow across the developer community through meetups and conferences
- Coordinate with Account Executives, Customer Success Engineers and Solution Architects for expanding the use of Databricks platform within strategic enterprise customers weekly
- Assist the Professional Services leader and project managers with level of effort estimation and mitigation of risk within customer proposals and statements of work
- Assure that Databricks best practices are being used within all projects and that our quality of service and implementation is strictly followed
- Knowledge transfer, enablement and mentoring of other team members, customers and partners

What we look for:

- Deep hands-on expertise in Apache Spark™ (Scala or Python)
- Experience with other Big Data technologies (Hadoop ecosystem, Kafka, NoSQL databases)
- Familiarity with a full range of data engineering approaches, covering theoretical best practices and the technical applications of these methods
- Experience building and deploying a range of data engineering pipelines into production, including using automation best practices for CI/CD
- Experience with cloud providers such as AWS, Azure or GCP

Benefits:

- Health insurance
- Paid time off (4 weeks plus 11 government holidays)
- Dental insurance
- 401(k)
- Vision insurance
- Flexible schedule
- Company paid life insurance
- Annual discretionary bonuses

COVID Notice:

- A new Federal Executive Order requires that employees of Federal contractors and subcontractors be fully vaccinated for COVID-19. Accordingly, as a condition of employment with DataHaven Solutions, employees will be required to provide proof of full vaccination against COVID-19 or have an approved exemption prior to starting employment.
