

**Operators Around the World
and in the Most Extreme Conditions
Only Choose Meco**

Here's Why:

- **Versatile**
-40°F to +158°F operation.
- **Gets the job done**
Loud (100 db) Pulsating Alarm and Alarm Light to alert the operator when the product level reaches the preset level.
- **Quick field retrofit**
No conduit or wiring required.
- **Capable**
Can be used on protected or standard tanks.
- **Easy to use**
A simple, single push-button switch for test before filling tank and to reset the Audible Alarm after the high level alarm point is reached.
- **Flexible**
An adjustable float switch to accommodate a wide range of high level alarm point settings.
