

La Mision Resource Center/el Centro Recursos Ecologicos (ECORC)

"...the Eco Resource Center is an experiment in pre-collecting very specific materials that can be incorporated into reuse projects. It is a first step in redirecting trash out of landfills to a better upscaled next life. It is just a beginning."

Susan Craik

Funds raised today will go to several projects:

- Provide resources and classes to our community and outreach organizations, to re-purpose materials into crafts, artwork, etc, to create economic opportunities;
- Purchase bottle cutters and create kits including clear goggles, wet sand paper, etc, that will be used for student classes;
- Improve signage and expand center.

What can I take to the Resource Center?

Soda bottles with this star on the bottom. Please rinse and leave the caps on.

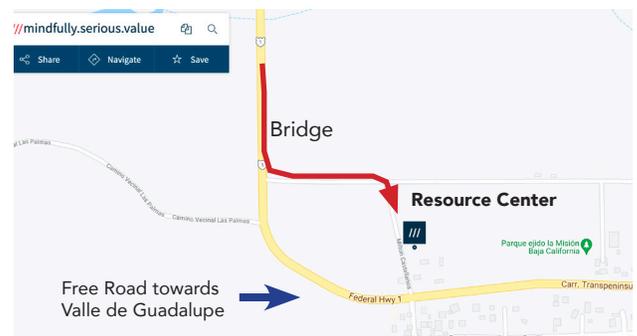

Wine and liquor bottles. Please rinse and place in designated area by color and type.

Location: Off the free road heading east to Valle de Guadalupe, after Magañas, and just over the bridge turn left before the aggregate yard. Follow the signs.
