

# Wellness<sup>®</sup> Pro+

FDA, CE, CAN/CSA, ISO 13485, ETL, UL, IEC cleared, certified and approved!

## New Features!

- \* Full Micro Current Control. Works similar to the Quartz Crystals. You can control lowering the current output and intensify the frequency output for sensitive areas.
- Multi Auto - run multiple auto programs. You can now stack group codes one after the other. This feature would let you continuously run the Wellness Pro Plus all night without getting up to put in another group code.
- Can program up to 1 million frequencies (TENS AND Micro Current).
- 1000 Pre-Programmed Auto Codes to choose from.
- Have the option to utilize the standard 250 Single Channels for programming.
- Harmonics- If you were to listen to the Eagles and the lead singer was singing alone, that would be one frequency. When the Eagles sing together/harmonizing that would-be harmonics. Harmonics are in every living creature, organism, etc. Most frequency generators (past and present) may have the single frequency but do not have the harmonics. Many researchers emphasized the power of harmonics for receiving the best results. The Wellness Pro Plus has been tested and certified for harmonic accuracy.
- Units and accessories built and laboratory tested to meet the highest industry standards FDA, CE, CAN/CSA ISO, ETL, IEC for ultimate accuracy and safety.
- DUAL mode (Interferential) – running two units (up to 8 lead output) at one time. The Wellness Pro Plus has 2 independent output ports with an option to run separate frequencies on each side. You can have 2 people using the same unit, with different personalized frequencies running simultaneously.
- FLUX - set frequency range parameters for unit to target. Now you can program the Wellness Pro Plus to go up and down up to 10 different frequencies within each 3-minute frequency. An example of this would be if you are running a group code and the first

frequency is 10,000hz. The Wellness Pro would run (going up) 10,000, 10,001, 10,002 etc. and (going down) 10,000, 9,999, 9,998, etc. This feature is available if you feel you want to improve your results.

- Backup / Restore. The Wellness Pro Plus utilizes a STIM card – to personalize custom card back up data. Many Practitioners utilize this feature to personalize group frequencies for each patient. For those that have more than one Wellness Pro Plus, this saves time programing your second unit.
- Enhanced wave types: Burst, Spectrum, Sweep, Duplex, and Continuous. Some researchers believe that the brain can get accustomed to a frequency and then ignore it. This feature bypasses the brain resistance by utilizing different wave types.
- New ultra conductive lead wires for unmatched high level of frequency delivery for better results.
- Large full color screen for better visual clarity.
- Dedicated extension port for new upcoming accessories and new devices. We are waiting for FDA clearance for a cold laser accessory that will be using this feature for pin pointing body locations and to reduce facial wrinkles.
