Date Founded:

1896

Roche has a 120-year history of advancing the field of medicine and bringing novel treatments and diagnostics to patients. We are the world's number 1 in biotech with 17 biopharmaceuticals on the market. Over half of the compounds in our product pipeline are biopharmaceuticals, enabling us to deliver better-targeted therapies.

Roche was one of the first companies to bring targeted treatments to patients. With our combined strength in pharmaceuticals and diagnostics, we are better equipped than any other company to further drive personalized healthcare. Two-thirds of our Research and Development projects are being developed with companion diagnostics.

We are guided by our purpose: Doing now what patients need next. We believe it's urgent to deliver medical solutions right now – even as we develop innovations for the future. We are passionate about transforming patients' lives. We are courageous in both decision and action. We commit ourselves to scientific rigor, unassailable ethics, and access to medical innovations for all. We do this today to build a better tomorrow.
