Website:<https://www.kivo.nl/>**Date Founded:**

2014

In 2015, KIVO LLC began officially its production in Kosovo. It represents one of the most developed companies in production of flexible plastic packaging in South Eastern Europe. It combines long term expertise of its Dutch partners with the business development acumen of the local partners in Kosovo, and a vibrant and quick learning local work force. Its position ensures quick access of its products in most South East European markets. Since its inception, the company has tripled its staff and significantly expanded its manufacturing capacities. Already in possession of digital printers and converting machinery of highest quality, the company has recently installed a 5-layer co-extruder, enabling it to produce the highest quality shrink film. KIVO LLC is proud to have household names in the food, bottling and packing industries as clients. It is ISO 9001:2015 and BRC certified since 2016.
