Al Asad, Iraq

Services Provided
Project Executive | Program Manager

Project Highlights:

**Master Planning
 Contracting New & Remodel Const.
 Infrastructure Study & Improvements**

Value
 Excess of \$1Billion
Completion Date
 2004/2005

Richard lead a Military team which was tasked to perform master planning and provide program management services for the air base at Al Asad, Al Anbar Iraq. Our range of services included: Construction and Engineering, Logistics, Security, Plans and Operations, Host Nation Coordination, Contracting, Information Management, Morale Welfare and Recreation, Legal, Human Resources, Finance, Security, and Safety.

The first priority was the development and execution of an enduring base master plan. In support of this effort we conducted infrastructure assessments and improvements of the following utility systems; water, waste water, power and electrical distribution, aviation fuel and environmental. We oversaw the design, bidding and construction of several new building projects. We also coordinated the assessment and renovation of many of the 350 existing buildings on base.
