and Sidewalks**

**Gallery Seating**

# NASSIF AQUATIC CENTER

A refreshing renovation to an out dated community pool area has created an exciting water park with a new slide tower feature, Zero-depth entrance wading pool with nineteen interactive features including an Aqua Arch, Mushroom Maze, Over N Under, a Pop Drop, and a large, interactive play feature with a tipping bucket.

Design and Construction began at the end of Fall 2008. The pool opened to the public on May 25, 2009. Project delivered on time, in budget, as planned.

Due to owner requirements for a Memorial Day opening in 2009 it was necessary to Design, Bid and Build nearly simultaneously. We successfully completed the project from concept to final in ten months an accomplishment that very few thought possible.
