

Calendar Updates

FOR
August, September, and October 2024.

Busy, busy! The calendar updates are reflections of the Exodus's Transitional Movement's dynamics in real-time, as seen in the perpetual changes of the operands. The 'four horses of the apocalypse,' a metaphor for significant societal upheavals, compelled the Ten Tribes and Judah to construct the foundation and the cornerstone of the Gentiles' fourth and final social system. The host of heaven is now deconstructing capitalism/imperialism's columns systematically, as given in the seven trumpets, seals, and vials. Indeed, the Congregation of Israel is now being transitioned to the seventh seals and vials. For instance, there is a central international banking core for capitalism/imperialism from which there are countless global financial subsystems necessary for daily functions in every day's. Not only the financial and banking industries but all the columns supporting the Gentiles' social system are being deconstructed concurrently with the arrangement of new theoretical social constructs to negate old harmful practices that are incompatible with the Exodus' Transitional Movement. So, consider society's many processes are in motion simultaneously. With that in mind, the calendar updates identify the principal contradiction and the principal ASPECT that is ready for resolution, or the new elements are being arranged for the Commonwealth of Labor. Overall, the operand is the expressed numeric biblical method of resolving either the principal contradiction or the principal ASPECT of the contradiction as seen in the operand.

As we resolve old societal contradictions, new ones emerge in the U.S. A. and worldwide. These dynamics are reflected in the calendars and their updates. It is crucial that those with discernment take an active role in interpreting and questioning the events they witness, both nationally and internationally. The state of international affairs is not improving, but rather deteriorating, and we are now on a dangerous course towards WWII.
