

Calendar Update for June

Received May 28 & 29, 2024

Prophetic dynamics are causing calendar updates.

The calendars and updates received May 28 & 29, 2024, for May, June, and July reflect a pattern: calendar dates given to The Judahite before the actual months arrive.

Theoretically and in practicality, before our eyes, we see different dates and operands symbolically of relativity in the absolute. The Feast Days is a theoretical application of the relativity of calendar dates incorporated into the transitional movement of returning home to the Promised Lands and lands under statutes.

Calendar dates reflect changes:

- (a) In the alliance for and against Judah's plan to re-occupy Israel.
- (b) Practical procedures of each tribe awakening to his family identity and
- (c) There are many social and personal issues that each tribal member of Israel must find resolute.
- (d) The Four Angels' effects hurt the earth and force social dislocation.
- (e) The 144K organizers corps adjusting to its new role.

However, the Updates reflect the changes behind the scenes or in the open, providing us a sense of security and understanding.

Theoretically, there is relativity in the absolute, as seen in the growth or expansion of operational changes, positive or negative, that affect prophetic historical events.

The significance of calendar updates lies in the realization that the host of heaven is moving in real-time through real-time processes. This understanding should emphasize the active role of the Congregation of Israel, as they are not mere spectators but integral contributors to the dynamic changes that negate aspects of the old social system.

Yes, there must be mental, psychological, social, and religious struggles in aspects of our lives, regardless of the divisions or levels we occupy daily.

Now and then, the new Congregation must be sufficiently mature possessing the required skills for constructing and maintaining the Commonwealth of Labor upon returning to Israel.

After departing Egypt, the Congregation needed to be spiritually mature to know the difference between struggling FOR or AGAINST. For instance, the Israelites thought they were to perpetually struggle against the Canaanite's giants, when in fact, they struggled to uphold the LAW given divinely for their spiritual growth as the new nation in the region.

Looking back over five thousand years, we can genuinely appreciate the enduring relevance of Mt. Sinai Covenant. Man's legal systems associated with stages of civilizations have appeared on the earth and disappeared, yet the Law of Mt. Sinai stands firm, though no longer exclusive to the Congregation. The righteous Gentiles have found moral dogma in the LAW, and the New Testament of Jesus allows sinners against the LAW to come to him in repentance to receive mercy and spiritual salvation.

What is new

Those transitioning into the millennium are being introduced to the new and exciting theocratic science, as seen in the calendars and calendar review summary. This science enables a comprehensive understanding of processes with all their interconnections. Each historical process has its own unique stages of growth, leading to significant qualitative milestones. As these qualitative states evolve, they eventually align with and support society's new or emerging trends.
