

**May 30**  
**is the assigned date given by May 29.**  
**The Doctrinal Precept of Three is May 30th's**  
**Action Plan.**

The three days following Pentecost, The Judahite worked with the data given to fashion triadic programmatic action plans for the 144k and Firstfruits.

On May 28, the Spirit of Instruction delivered time *schedules of unfolding* action to The Judahite. According to the Court's mandate issued on May 29, 2021, the implementation plan for removing the Congregation's enemies, a hindrance to progress, would be disclosed on May 29.

On May 28, The Judahite made a mistake interpreting the value of the assigned numbers. Regardless of the reasons, the nomenclature got substituted. Upon reexamining the numbers, the error was caught on May 29, causing no harm.

Indeed, May 29 fulfilled its required date for offensive action plan disclosure. On May 30, The Judahite received a graphic presentation of the changes to come during the day.

Now is a perfect moment to give notice of caution to the 144k and Firstfruits: stay away from the sensationalism of any given day and follow scriptural outlines for end days and the outlined approach provided by The Judahite.

The three days should be viewed as the three days of unity and equilateral positioning to portray coming changes. Factually, May 30 is the day of angles signaling changes.

From the observing windows of time, equilateral, when, seen substantiates its current arrangement to propel necessary changes for replanting the Congregation in the Lands of Promise.

The Executive Body of Israel will maintain its balance of governance because equilateral proceeds from the need for balance in fashioning the Commonwealth of Israel while fighting on many fronts at the same time against forces of the anti-Stone Kingdom.

From an advantageous position, The Judahite walked upon the prophetic platform to receive the triadic driving force of sustainable changes. In years past, The Judahite saw the collapse of buildings, COVID-19, and other devastations from the same platform.

The platform has a long record of trustworthiness and is global in scope. Note the point of emphasis given by the Spirit of Instruction to The Judahite: electromagnetic telecommunication is part of May 30<sup>th</sup>'s action plan. Telecommunication will be available when and where necessary worldwide and for years even. Sending and receiving communications will end as currently practiced.
