

Biblical numbers always cross-check themselves for self-validations.

February 3, 2022

The Judahite received binary codes and translated them as 4, 7, 9, 24, 12, 20, & 42. Randomly, 12 and 24 stood out in threes from a long string of converted numbers. 20 and 42 appeared randomly twice from the same line.

The numerical biblical three is trustworthy and **solid**.

Understanding the methodology

The aggregate dates of February, March, and April will transfer to May. For example, the 4th day of each month validated itself. **For amplification**, the three date values are summated to **May 4, 2022**.

Likewise, 7, 9, and 12. These are impressive numbers. Look at when they materialized.

On April 23, 2022, 4 and 12 materialized unnaturally

On April 26, 2022, 9 and 7 emerged unnaturally.

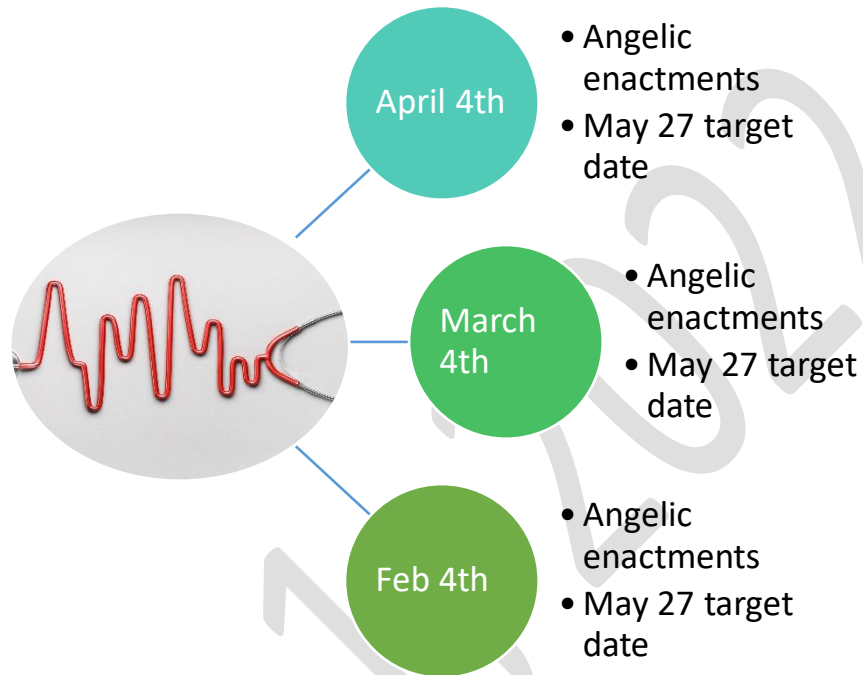

The dated events self-check their integrity.

On the other hand, there are dreadful dates in February that might or might not coincide with 7, 9 and 12. Still, they will be listed.

The essential thrust of biblical four is intermixing with two and three, though three plays a significant role pragmatically.

As a general outline

- a) expect safety and protection.
- b) an epiphany of one's tribal affiliation.
- c) quantitative transitional steps toward departure.

Alert Notice

The Judahite received a visitation from Raphael in early A.M. on May 1, 2022. Executing the numbers will be **fast and decisive**. May 1st establishes the tempo for the rest of May. For sure, fear will grip many because man neither can slow down the acceleration nor stop forward progress.
