

Part One

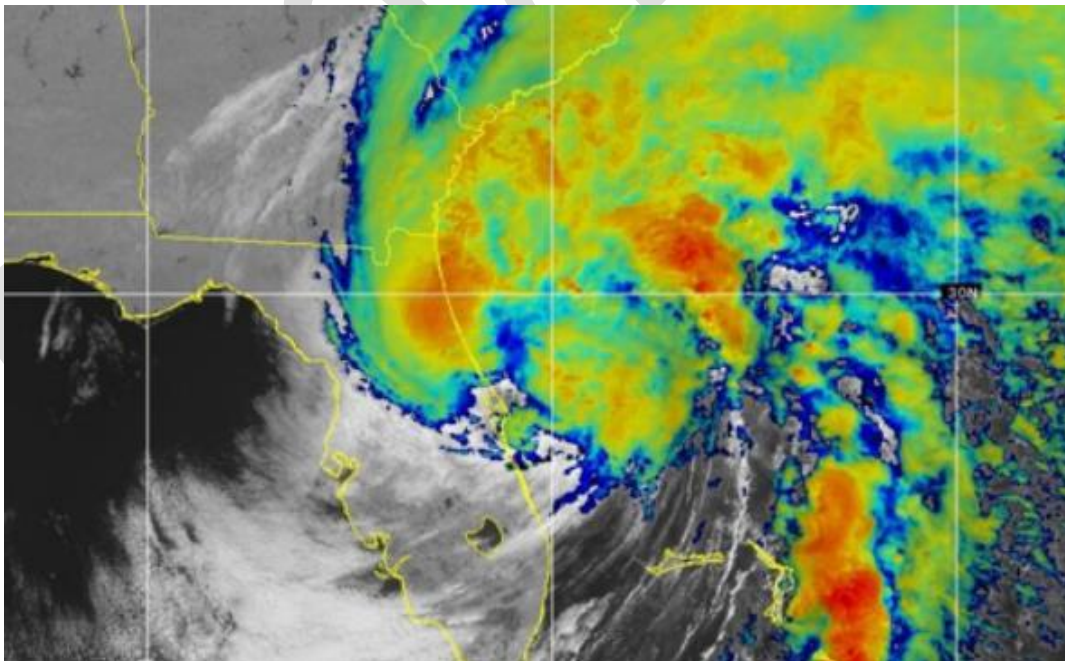

September 28, 2022, Updates

Mistakenly viewed, The Judahite received an illustrative message on September 27 around 11:30 pm, thought to be the certification of September 28. All milestone dates given to The Judahite in record form by the Spirit- of-Timely- Events are verified by unnatural means of self-verification.

However, The Judahite received the recognizable certification for September 28, 2022, as a day of material blessings, at 1 am on September 28, 2022.

The Judahite returned to re-examine the first illustrative message, which proved accurate. Massive watery activities were correctly certified at 11:30 pm on September 27. On point, **the record of September 14 shows with 100% absoluteness the divine water event of September 28!!!** In this instance, The Judahite mistakenly separated the waters of replanting with waters of destruction, which should have been combined. Nevertheless, two separate events on the same day!! *[On September 29 at 4:03, the Spirit-of-Timely-Events approved this report.]* In a word, demolition and rebuilding must co-occur.

**Ian will go down as the deadliest hurricane in
The history of Florida.**

Sept. 28 events in Florida will be tied to 2024

When closing the day, The Judahite took careful notice of the implied strain of events to be repeated on August **24, 2024**, with association to September 28, 2022. Detailed statements mean that The Judahite observed all that the Spirit-of-Timely-Events displayed throughout September 28, 2022, to conclude herein.

Conclusion

The water levels will come above treetops in selected areas in 2024. With 100% confidence, many will perish. Indeed, we are looking at pre-flood days in 2024, except on a smaller scale.
