

The Day after Pentecost

In the first posted draft on May 27, The Judahite highlighted the amplification of the Feast of Weeks/ Shavuot part of the New Covenant. After posting the draft, four additional amplifications were presented to The Judahite. As of today, other events have taken time away from processing. Regardless, the additions have been recorded and registered, and later they will be posted.

May 27 came as a statutory cutoff date for solemn promises inclusions for amplification.

As a secondary protocol, The Judahite entered an ecclesiastical libation formality for the acceptance, followed by high-importance petitioning the LORD.

The Priority and the proceduralized implementation of ORDER24J

May 28 came as a busy day for The Judahite to receive and process data. Standing in between the day of ratified New Covenant, May 27, and Court's approval on May 29, May 28 directs our attention toward the order implementations of sub-divisions per ORDER24J.

The following comes directly from the Spirit of instructions of the Second Heaven.
