

## Introduction

On July 11, The Judahite received a visitation from the heavens to expect an imminent announcement. Indeed, late evening came with a composition for July 15 and 14. Yes, in that order. As background, from the 9<sup>th</sup> of July to the thirteenth, the days came with exclamation data points already discussed, but much more clarity can be shared. Still, nothing new would be added to what has been scheduled as wrath and weaponized telecommunications and electricity.

President Biden's visit to the Middle East on July 13 came as a prophetic certified visit, noting the occurring shift or the crossing. Herein is a parallel exegesis of Gilgal and Gilgal II.

- a. The Reasoning for the forty years of isolation. The Congregation crossed River Jordan as a nation having its Theological Constitution with the Ten Commandments as the amendments. In contrast, The Judahite received the New Covenant for the Congregation because the Sinai Covenant fell into disused due to the Mosaic Curses. A new Tabernacle, a living Tabernacle, is now being fashioned. Using the same pattern as Moses during the wilderness days, a new Tabernacle would come into being after the Congregation crossed the Atlantic.
- b. Dedication to personal relationships, families, and nation, the new circumcision is for both men and women. A theological circumcision has the eternal blessing of happiness.
- c. Archangel Michael will be by our side, for he is our shield.
- d. As a standing legalized procedure in the Second Court of Heaven, The Judahite waits in silence as the Court writes its deliberative ruling. From 12:26 am to 5:38 am on July 15, 2022, The Judahite received fourteen data points from the Second Court of Heaven. Seven equals replanting, and the other seven equals the expected blessings of the crossing.
- e. The Judahite points out that time changes the sequence of matter. No need to attempt to explain. The Bible gives many accounts of how matter is changed or put in a different series. Look. Fifteen came before 14, as shown on July 11. Yet, 14 events appeared on the 15.
- f. On July 14, The Judahite received an order to break camp on July 16.
- g. We will be breaking camp at Gilgal II on July 16, preparing things for an orderly procession.

## **Gilgal II**

### **Crossing the Atlantic**

Often the word prophecy is used with the added definition to express wishful desires or a make-be reality. Biblical prophecy is defined as history told in advance, either shown in visions or dictated to the servants of the LORD for delivery to the Israelites.

Taking over fifteen hundred years to write, the Holy Bible tells the whole meaning and purpose of the Father, Son, and Holy Spirit. Yeshua is the centrality of human history on the earth for the Israelites and the righteous

From the Garden of Eden, human history divided itself into two parts, as expressed in the Edenic Judicial Decree, wherein the Serpent would crush the head of Adam's descendants, and Adam's descendants would immobilize the heels of the Serpent's descendants. The conflict

would always produce results as designed. In essence, the Serpent's molecular gene will always seek to crust the truth about the creation of the earth and Adam's purpose.

Yeshua, the Redeemer, came at the appointed time on the space-time continuum, marking his first appearance on the earth to bring his New Testament Doctrine to humanity.

For such a task, the Israelites were selected as the vehicle to carry the light about Yahawah to all nations of the world.

After departing Egypt and spending forty years in the wilderness, the Congregation crossed the Jordan River with a theological constitution with the attached Ten Commandments as amendments. At Gilgal, the Congregation consented to dedicate their lives, personal relationships, and family relations to the theocracy of Yahawah through circumcision.

Because of man's innate inability to create galaxies and constellations, Yahawah instructed the Congregation to watch for constellations' alignments and the moon's cycle to understand better the interface between the Congregation and the host of heaven.

Thus, there isn't anything personal about humanity's destiny on the earth. Before man appeared on the planet, man and the earth's destinies were foreknown. Indeed, the world will be destroyed sometime after one thousand years. For the advanced race of the Congregation, relocation would have already occurred as living in an advanced spiritualized planetary system.

The Judahite and the Executive Body of Israel will rule through the outlined history foretold, nothing personal. July 13, 14, and 15 are days that signal Gilgal II by which the Congregation gives signs of its health recovery and ready to move to take possession of the Promised Lands.

## **President Biden: a prophetic element in Judah's transverse**

Meeting with the Palestinian authority made it onto Biden's four days visits to the region.

For a quick review of the Executive Body of Israel's declared policy position, the Palestinians are free to live in the area on the condition that they abandon claims of self-determination and a two-state solution. An acknowledgment of the situation a red cloth must be attached to the dwelling as a sign of the Executive Body of Israel to skip over, to preserve life. For whatever reason, those Palestinians who seek a different course must depart from the land and never look back. Moreover, there will be one religion in the Lands of Promise. Outside the marked countries, anyone will be free to worship their gods.

When the Executive Body of Israel re-enters the Land of Promise, Palestinians' issues will not give a minute.

As a historical notation, when Israel's statehood was drafted in 1947-48 for United Nations' resolution, the Edomite or Esau gave the Palestinians a land claim to Israel. There are two reasons: first, the Edomites had ongoing intentions to retake part of Jacob's blessing by making false claims. The Holy Roman Kingdom built the Dome of the Rock and wrote the Koran to ensure Jacob's descendants would never regain complete control over Israel and Jerusalem. Secondly, whereas land claims rights would be fought between the Jews and the Palestinians, the design aim was to prevent Judah from regaining control of the deeded land under the Abrahamic Covenant.

**Biden previews the Executive Body of Israel's power and authority over Palestine. Biden is a representation of The Judahite because he was elected under Judah's prophetic jurisdictional control over the country of Israel.**

## **President Biden flies directly from Israel to Jeddah, Saudi Arabia**

On all accounts, President Biden made history when he flew directly from Israel to Jeddah. As often is the case, prophetic dynamics can only be seen by the skillfully trained eyes because of the degree of complexity.

The economic crisis forced President Biden to take steps under abnormal conditions. Briefly, without levels of details, all significant systems have points of origin. When they break down in the interdependency of the dying, order the operational components return to their natural state, the original state, as a reconditioned component for reuse in a new fashioning formation that is qualitatively different from the old environment.

The oil industry. The Petro-Dollar and the Petro currency. Nat Turner gave us the model of imperialism. The Asherite gave us an illustrative model of oil and its organic relation to military power and might.

Judah's slave labor in the Middle East during the Arab Slave Trade and his slave labor in Texas engenders the release of his theological blessings upon the Petro currency.

At the pivotal point, Judah's time has come to use oil to shape the Commonwealth of Israel. The Asherite has illustrated these points, which ties directly into ending the Mosaic Curses.

The war in Ukraine has devastating economic consequences. Russia has turned off the oil flow to Europe in defense. In a few months, tens of millions could freeze in different places worldwide, depending on the weather conditions and the duration of the war. Already, social upheaval is now seen in other parts of the world due to high inflationary prices and outright shortages.

China is planning on invading Taiwan in the fall. When the situation cannot get any worse, the world will experience an oil shortfall.

President Biden sees the realities. Regardless of the perspective, the picture is terrible. As is always the case, the so-called experts' predictions are wrong. In America, the inflationary prices and food shortages in the stores will continue to become a new daily reality.

A Preview,  
The Judahite will issue orders for the government to dissolve and go into perpetual exile.
