

Miller Wood Supply: Your Trusted Partner in Mattress Industry Solutions

Since our founding in 2005, Miller Wood Supply has grown into a leading provider of high-quality wood products for the mattress industry. With mills and production capabilities spread across the United States, we leverage nearly five decades of experience from our industry veteran owners to deliver unparalleled expertise and service.

We specialize in cut-to-size wood, foundation trusses, preassembled foundations, bunkies, flat frames, and fully completed, ready-to-ship foundations. All raw material is sourced from the highest quality of renewable, Eastern Canadian Spruce. Our ready-to-ship foundations come boxed and are white-labeled, ready to ship directly to your distribution facilities or customers.

Our four lumber mills in Pennsylvania are capable of producing over 50 million board feet annually. To complement this, we have partnered with numerous manufacturing organizations across the United States to provide essential bedding components both domestically and internationally.

Our commitment to customer service, quality, and price is unwavering. We don't just supply materials; we provide comprehensive support, including setting up assembly operations at our customers' plants and offering tailored bed frame designs and specifications.

Partner with Miller Wood Supply for reliable, high-quality solutions that support your success in the mattress industry. We deeply appreciate your consideration and are confident that our products and services will exceed your highest standards. We look forward to the opportunity to serve you.

Thank you,

Steven Farrar
