Wound Care Program

Our Wound Care Program utilizes state-of-the-art wound care technology and advanced wound care products to ensure optimal patient outcomes. Overseen by a certified Wound Ostomy and Continence Nurse (WOCN), our program can maximize the quality of life for a wound care patient. Our nurses provide patient education and treatment regimens as ordered by your physician to ensure wounds heal. Our individualized approach to treating patients' wounds reduces complications, promotes healing, decreases the chance for infection, and keeps patients healing safely at home.

Our Wound Care Program includes assessment, evaluation, and identification of patients who are at risk or need treatment for:

- ✚ Specialized wound care treatment plans as ordered by your physician
- ✚ Pressure ulcers, surgical wounds, burns, or trauma wounds
- ✚ Blood circulation challenges (e.g., diabetic, venous and arterial)
- ✚ Expert consultation by certified wound, ostomy and continence care (WOCN) RNs
- ✚ Wound care management, including dressing changes, healing time optimization and future wound prevention
- ✚ Pain management
- ✚ Negative pressure wound therapy
