TRUE LIFE UNITY

Humanity for Changing Life

Annual Work Report

2017-18

Introduction

True Life Unity is a charitable organization created to help the needy and the underprivileged section of our society. This section includes the poor and the needy people who cannot afford to provide their children their daily bread. In such situation, often children are forced to work to earn their livelihood to survive in the society. It is really disheartening to see that at such a young age when children are supposed to go to school for primary education and enjoy the benefits of their childhood, they have to work for their survival. These children are not getting their fundamental right of receiving primary education which is of prime importance in Indian constitution. Our aim is to help these children to get their daily bread and fulfill their daily needs, like proper clothes, meal, school books, stationery, etc. so that they can get primary education as well. If we can give them at least their right to free education and the basic necessities, we would be happier and our life would be worth it. We are doing our bit and request you to be a part of it and encourage us to follow the path of humanity to make India incredible in the real sense of the word.
