

SEEN III SYMPOSIUM

Reimagining Affordable Housing & Development

Housing Solutions of New York's Third Annual SEEN Symposium (SEEN III) convenes housing practitioners, policymakers, developers, advocates, and community leaders for a full-day, solutions-driven dialogue focused on **Reimagining Affordable Housing & Development**.

Building on the momentum of its previous convenings, SEEN III reflects HSNY's continued commitment to advancing innovative, equitable, and people-centered housing solutions across New York City and beyond. This year's symposium challenges participants to move past traditional housing models and explore bold approaches that respond to today's housing crisis while laying the groundwork for sustainable community development.

Throughout the day, attendees will engage in keynote conversations, expert panels, and interactive workshops that examine the intersection of housing, policy, design, financing, and supportive services. The symposium will highlight best practices, emerging development strategies, and cross-sector partnerships that center dignity, lived experience, and long-term stability for individuals and families experiencing housing insecurity.

SEEN III underscores HSNY's belief that affordable housing is more than shelter—it is a foundation for health, economic mobility, and community resilience. By bringing together diverse voices and disciplines, the symposium creates a space for shared learning, collaboration, and actionable outcomes that advance housing solutions rooted in equity, innovation, and impact.

Abstract:

The urgent challenges surrounding affordable housing and community development require bold, collaborative approaches that move beyond traditional solutions. Housing Solutions of New York's Third Annual SEEN Symposium convenes housing experts, policymakers, developers, community leaders, and advocates in a focused dialogue aimed at reimagining how affordable housing is designed, financed, and sustained. Through engaging discussions, real-world case studies, and interactive sessions, the symposium explores integrated strategies that connect housing with supportive services, economic mobility, and community infrastructure. The ultimate goal of SEEN III is to advance innovative, inclusive frameworks that bridge gaps in housing systems and promote equitable, resilient communities where individuals and families can thrive.

Key Themes:

- Reimagining Affordable Housing Models
- Equity & Lived Experience in Development
- Integrated Supportive Services
- Sustainable, Community-Driven Solutions

OF NEW YORK

SEEN III SYMPOSIUM

Reimagining Affordable Housing & Development

Format:

SEEN III will be a full-day, in-person symposium featuring keynote conversations, moderated panel discussions, and interactive workshops. The format is designed to encourage cross-sector dialogue, knowledge sharing, and collaborative problem-solving, while centering both professional.

Expected Outcomes:

- Increased understanding of innovative and equitable affordable housing and development models
- Strengthened cross-sector relationships and partnerships
- Practical strategies participants can apply within their organizations and communities
- Shared frameworks to advance housing solutions that integrate development, services, and community impact

Target Audience:

This symposium welcomes policymakers, housing and homelessness practitioners, affordable housing developers, nonprofit and faith-based leaders, researchers, advocates, and community stakeholders who are committed to advancing equitable, innovative, and sustainable housing and development solutions for individuals, families, and communities most impacted by housing instability.

Conclusion:

Housing Solutions of New York's Third Annual SEEN Symposium serves as a catalyst for reimagining affordable housing and development as a foundation for stability, dignity, and opportunity. By convening diverse stakeholders and centering collaboration and innovation, SEEN III advances actionable solutions that strengthen communities and move the field toward a more equitable and sustainable housing future.
