

Artist Contribution & Compensation

We offer compensation to artists whose work is highlighted in our NFT collection. We thank these artists for their contribution to public space in New Orleans. We consider their work to be complimentary to the overall statement of our project. While we are able to directly contact some artists, the nature of street art, however, is that it is a product of anonymous contributors and artisans creating under the threat of police violence. Yet, we value artistic expression. For these reasons, we would like to work further with these artists for compensation and on future projects. We ask that they contact us: metaartheart@gmail.com.
