<![if !supportEmptyParas]> <![endif]>

2. From and after the date of this Resolution, any commercial structure must have an interceptor and separator, commonly known as a grease trap, of the type or according to plans approved by the Operations Manager and the Authority Engineer.

3. Any such interceptor shall be of a design and capacity and shall be installed in a manner provided in Section P-1002.0 of the Building Officials and Code Administrators (BOCA) National Plumbing Code, 1978 Edition, as amended from time to time, and the reference section of the BOCA National Building Code, 1987 edition, as the same may be amended from time to time, is hereby adopted by reference as though the same were herein set forth at length.

<![if !supportEmptyParas]> <![endif]>

4.
