NEMTA's Voice Competition 2021 is designed to inspire and bring together a community of singers who share the passion & dedication for music. Even though the majority of the world is confined to working from home this year, an online competition provides a unique opportunity for musicians to collaborate safely and with a sense of community, to develop & grow their skills, and to establish their online presence through video platforms & social media outreach. We will feature the winners & their instructors on our website, broadcast their performances on our YouTube channel and share best performances with the world. We invite students, schools, teachers & colleges to come together for this unique event! Visit our website for additional info.
