Dermibel® COLLAGEN REPAIR

Beauty
is not luck...
Beauty is science!

SYNERGIC
EFFECT

Fortified
collagen drink
containing prebiotics

ELASTICITY →

Marine Hydrolysed Collagen

- raw material of European origin with maximum usability for the human body
- a key raw material for ensuring skin elasticity and joints in an effective dosage

HYDRATION →

Hyaluronic acid

- patented raw material produced in the Czech Republic
- its exceptional ability to bind water provides the skin with natural elasticity and a protective barrier

STRENGTH →

Minerals

- minerals of natural origin from the clean waters of the Atlantic Ocean
- vitamins for synergic action of all ingredients to achieve an effect from inside and outside

NUTRITION →

Soluble fibres

- for building your inner beauty
- fibre creates the right environment for a functional immune system

PERFECT DRINK

for inner health and outer beauty

Dermibel Collagen Repair® dietary supplement is a powder collagen drink with an exceptional composition and fresh taste raspberry. The formula is composed of carefully selected active substances and raw materials with the aim of not only nourishing the skin, hair and nails, but also harmonizing the internal environment of the organism, thanks to added prebiotic substances, fructooligosaccharides and the **Aquamin®** mineral complex.

This calcium from the seaweed *Lithotamnion* sp. and very well absorbable magnesium from the clear waters of the Irish coast form a unique source of natural mineral substances. Pleasant raspberry flavour is created by combining raspberry powder and natural aroma. Individual portions are wrapped in separate bags for ease use.
