Fischer Block, Inc.

Features and Benefits

- AI and Neural Network-Based Learning
- SCADA Data Enhancement
- Minimization of False Predictions

Application and Solutions

Grid Modernization - enhance reliability
Wind and Solar - Optimize performance of assets
Predictive analytics to improve operational efficiency

Features and Benefits

- Intelligent Sensors
- Visual Monitoring
- Visual Software

Application and Solutions

Remote, real-time asset monitoring
Intrusion detection and security enhancements
Remote monitoring of critical assets

Features and Benefits

- Full Line of T&D Structures
- Monopoles, H-Frames, 3-pole structures
- Custom-engineered structures

Application and Solutions

Areas at high risk of forest fires, coastal environments
Utility Structures & Telephone poles

Innovations

Fiber-reinforced polymer (FRP) composite poles

Features and Benefits

Lightweight, Strong and non-conductive

Application and Solutions

Exceptional fire resistance
Resistant to corrosion, rot, UV, water absorption, critter damage

Innovation

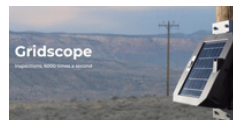

Real-time grid monitoring technology - Gridscope

Features and Benefits

Proactive fault detection and efficient problem resolution to ensure grid reliability and safety.
Fault Intelligence

Application and Solutions

Strategic Preventative Maintenance
Enhanced Asset Management
On-Device Signal Processing

Features and Benefits

- Large and Medium Transformers
- Energy Storage Systems
- FACTS

Application and Solutions

Specialties

- Porcelain Insulators for Substation & Transmission

Features and Benefits

- Portfolio of long rod, hollow, and post insulators
- High performance in High Voltage contaminated environments
- Engineered Solutions

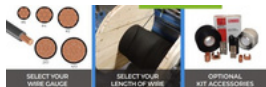

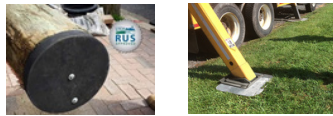

Features and Benefits

- Condu-Disc Corrosion and Ground Plate
- Temporary Protective Grounding Products
- Condu-Create

Application and Solutions

- Grounding & Corrosion Solutions

Expertise

- Electrical Porcelain insulators - Distribution, Substation applications

Products

- Substation, Electrostatic Precipitators, E-filters, Guy Strain, Pin Type
- Long Rods
- Engineered Solutions

Features and Benefits

- Automation & Control
- Substation Solutions'
- Communications

Application and Solutions

- Asset Monitoring
- Protection Relays

Features and Benefits

Panel Built's provide modular building solutions. Adaptable to fulfill the demands of virtually any space management challenge.

Products

- Custom Equipment Enclosure Designs
- Control Houses
- Ballistic Rated Walls
- Insulated weather proof roof systems
