

revised 06/8/26

2026 NCPTA Transposium Course Descriptions

Advisory Board Meeting – The members of the NCPTA Advisory Board meet to discuss the business of the association. Members are encouraged to attend. TAG has officially been dissolved, and all information and business will take place at this meeting. The meeting is open to all members and they may ask questions, but only board members are allowed to vote. Facilitator: Brian McClung, NCPTA President

Ask the Field Guys - This session is a review of defects found during school bus inspections this year and an opportunity for LEA staff to talk with the DPI staff that performed those inspections. Facilitators: NCDPI Field Consultants

Best Practices: Tire Mounting, Match Mounting and Achieving a Smooth Ride – Learn the correct method of mounting and installing tires to achieve the best ride and increase longevity. This session is presented by Michael Everhardt and Chris Anderson, Deri Curry from The Goodyear Tire and Rubber Company

Blue Bird New Electrical Architecture (NEA) Diagnostics and Troubleshooting – This session is two hours. Presented by: Frank Barker

Blue Bird Propane Powertrain Orientation and Roundtable–This is a two-hour session. Presented by: Frank Barker

Blue Bird and Rifled Air AC Class – This is a two-hour session. Presented by: Frank Barker

Blue Bird Brake Systems – This is a two-hour session. Presented by: Frank Barker

Bosch Common Rail Diesel (CDR Seminar) – This seminar will provide a high-level overview of Bosch CRD systems with a specific focus on the Cummins 6.7 engine platform. The seminar will cover the complete fuel system from the supply side to the high-pressure components. You will learn how to accurately diagnose no start and drive ability conditions with confidence. The session is offered twice, see schedule.

The training will span two separate days, each with a dedicated two-hour session. Below is an overview of the topics that will be covered during the training:

- 1. Introduction to Cummins 6.7 Emission System:**
 - Overview of the Cummins 6.7 engine and its key components.
 - Understanding the role of the emission system in ensuring compliance with environmental standards.
- 2. Emission System Components:**
 - In-depth exploration of individual components within the Cummins 6.7 emission system.
 - Detailed explanations of how each component contributes to emission control and overall engine performance.
- 3. Diagnostic Procedures:**
 - Comprehensive guide to diagnostic procedures for identifying issues within the emission system.
- 4. Maintenance and Best Practices:**
 - Guidelines for routine maintenance to ensure the longevity and efficiency of the Cummins 6.7 emission system.
 - Best practices for optimizing performance while minimizing environmental impact.
- 5. Q&A Session:**
 - Dedicated time for participants to ask questions and seek clarification on any aspects of the training.

BSIP - Bus Parts Inventory–Searching, Stocking, and Verification - This class will focus on BSIP parts inventory, item search, new item application requests, and extension of the item to LEAs plant, items stocking, and verification of proper receipt. Presenter: Brandon Arrington

BSIP Data Entry Tips/Best Practices – Presented by Brandon Arrington

BSIP - Fuel Receipt and Issuing Via ZFUEL - This class will show users how to receive fuel, verify proper receipt, and issue fuel to vehicles via two different methods. The class concentrates on the accuracy of fuel data input and odometer readings, as well as identifying issues with incoming fueling data and resolving them. Presented by Brandon Arrington

BSIP - Making Corrections-How to cancel and properly correct errors – This class will show users how to correct entry errors. It will deal with incorrect parts, time and how to make cancellation and corrections. Presented by Brandon Arrington

BSIP Odometer Readings View / Entry / Removal - Presented by Brandon Arrington

BSIP – Work Order Printing and Entry (MI/PMs – This class will focus on work orders; 30-day inspections, preventative maintenance plans, and TD-18 maintenance orders. Concentration on the components of data (expectations, verifications, and input) along with work order printing and storage. Presented by: Brandon Arrington

BSIP – Work Orders (TD-18) and Non-Stock Parts - Presented by: Brandon Arrington

BusPlanner Training Session – Diving Deeper into BusPlanner and GPS. Presented by: Binford Sloan and Team

Carolina Thomas Advanced Electrical Troubleshooting – This is a two-hour session. LEAs A-M and LEAs N-Y (see schedule)

Carolina Thomas Braun Lift Service and Proper Maintenance - This is a two-hour session. LEAs A-M and LEAs N-Y (see schedule)

Carolina Thomas In-Depth AC Diagnostics and Repairs with Schematics - This class is designed for the beginner or as a refresher for the more experienced techs. We will cover theory and principles of operation, automotive refrigeration, electric controls, and temperature control systems. This class includes training in diagnosis, testing, service and repair. Class Instructor: Jamie McCaskill, Journeyman Technician.

LEAs A Thru M Class and LEAs - N Thru Y Class (2 HRs)

Carolina Thomas Introduction to CEEA+ – This session is two hours.

Carolina Thomas Introduction to Octane C2

Carolina Thomas Octane Ride and Drive

Carolina Thomas Parts Excelerator – This is a one-hour session

Closing Session and Dinner – This is a working dinner. We will have our business meeting and election of officers. The officers will take their oath of office. We will announce award winners and service pins. There will be great door prizes.

Conflict Resolution and Management – presented by Jay McCarraher and Misty Davis, Caldwell County School Transportation

Denso PowerEdge Aftertreatment System -

1. Why Aftertreatment Systems Exist
2. Core Aftertreatment Components
3. How Regeneration Works
4. Ash Accumulation
5. Common Failure Modes and Risk Areas
6. Remanufactured / Reconditioned DPFs
7. Regulatory & Compliance Considerations
8. Aftermarket Compliance
9. Importance of Quality in Replacement Components
10. Strategic Takeaways for Bus Fleets

Director's Panel Discussion – Marlon Watson is the facilitator for this roundtable discussion on hot topics for Transportation Directors across the state.

DPI Updates – Updates to LEA staff on the happenings in the Legislature and any other information relevant for the school year. Presenter: Kevin Harrison, Section Chief, NCDPI.

Edulog Athena Routing Training. This session will walk through Athena's route management capabilities. We will focus on the flexibility of address points compared to address ranges — how easy it is to create a new neighborhood, use the trace tool to build segments, bulk-update speeds, and let the Google tool name streets automatically for you. We'll also cover the flexibility of the student import (a chance to fix bad data before it affects your live area), RPO Bell Time tasks (nothing saves or deletes until you choose — work from your office computer and your home computer without losing any progress), live traffic patterns powered by Google Maps, and how Athena can automatically update directions and stop times when a routing change occurs while still giving users full manual control when they need it. All attendees are welcome, whether you have activated Athena or are considering it. There will also be a brief preview of Athena 2.0 including the new Field Trip module. Presenters: Jordon Faircloth, Sara Corbally, Shawna Knudson

Edulog Enhanced Communications - Parent Portal, Web Query, School Tools Request and Web School Assistance. - We will show best practices in how to provide schools with access to TIMS through Web School Assistant and even Web Query. The session will also cover how to make sure that parents receive the latest notifications with EDULOG's Parent Portal. School personnel can also enter transportation requests. This session will focus on best practices managing the data that supports your implementation of these important communications tools and how to use Athena to support the parent app. Presenters: Derek Graham and Jordon Faircloth

Edulog Tablets: Time and Attendance, Route Sheets and Student Ridership. Learn best practices for managing Edulog's tablet software and the Athena Time and Attendance interface. We will also provide instruction on managing your Student Ridership Data. Instructor: Shawna Knudson

EZRouting- Need an EZButton?

Join us to see how EZRouting transforms a 15-step process into just 2 steps, helping cut routing time in half—freeing transportation directors and routers to spend less time on manual work and more time managing exceptions, improving service, and supporting families and drivers. Speaker: Buttons Cheely

EZRouting - "It's 3 PM — Do You Know Where Your Kids Are?"

Explore how WheresTheBus gives districts accurate real-time visibility into where students and buses actually are, while turning transportation data into operational savings through better clock-in control and reduced fuel costs from less idle time. Speaker: Sam Arciprete

Federal Research and Assistance: Illegal Passing of Stopped School Buses – The problem of illegal passing has been well documented in the industry, and the national highway traffic safety administration (NHTSA) has taken on a multi-pronged study of school bus illegal passing incidents. This session will dive into the project findings thus far and suggest appropriate actions to improve school bus safety. Specifically, we will discuss NHTSA's projects focusing on technology, law enforcement involvement, training and education, to name a few. Presented by: Derek Graham

Gatekeeper Systems Product Demo – An overview of Gatekeeper Systems presented by Paul Abbott, Director of Customer Care

HopSkipDrive – Product Demo - Overview of HopSkipDrive capabilities, services provided, processes and the RideIQ Platform. We will also discuss how using multimodal transportation can significantly reduce lost instructional time. Presented by: Joseph Brumfield, John Ramirez and Michael Bonds

How to Make a Successful Vinyl Repair – This demonstration will include cleaning, prepping, properly applying and cooking vinyl repair compounds to create a strong, (pick proof repair). Presented by: Jerry Davidian

How to Properly Secure Wheelchairs on School Buses – Q’Straint
Presented by: Dennis Assaff

Leadership for Managers and Supervisors – How to Basics in Leadership. How to choose who will do what task. Becoming the driving force in your organization. Hiring superstars and mentoring falling stars. Time management for leaders. Presenter: Margery McGill, Johnston County Schools, NCPTA Membership Chair

Navigating Political Relationships Working with School Administrators – ALL positions are welcome (Mechanics, Office Staff, Directors, etc.) Dr. Matt Tedder, Stokes County Schools

NC Best Bus Inspector Contest – Top Twelve Hands On – The top twelve contestants compete for the title of Best Bus Inspector. Presenter: NCDPI Staff

NC Best Bus Inspector Contest Written Exam – The contestants for the competition will take the first part of the contest, the written exam. The top 12 scores will go on to compete in the hands-on test. Presenter: DPI Staff

NC Bus Inspector Certification Course – Inspection certification and re-certification class. Presenter: DPI Staff (Held at Buncombe County Bus Garage)

NC Bus Inspector Certification Test – Inspection certification and re-certification test. Remember for re-certification test a twenty-hour verification form must be turned in at the time of testing. Presenter: DPI Staff. (Held at Buncombe County Bus Garage)

NTSB Recommendations on Use of Lap/Shoulder Belts - The most recent recommendations from the National Transportation Safety Board focuses on a school bus crash in Leander, TX. In this session we will break down the recommendations from that crash and do a survey of legislation, policy requirements, available resources and speculate on the legal implications of inaction. Panel Discussion: Charley Melton, Rutherford County; others TBD; Moderator: Derek Graham

Opening Session – The NCPTA President, along with local dignitaries will welcome members to the Transposium. A dinner will be served.

Professionalism in School Transportation – Responding to Angry Customers – In this session, we will discuss tips on turning negative situations into more positive outcomes. Presented by: Diane Elkins, Elizabeth City-Pasquotank Public Schools

Roundtable for Cost Clerks – This open format session will allow people to converse about issues and solutions they face with BSIP and other areas of transportation. We all face the same challenges and sometimes hearing what a neighbor has accomplished just might help you as well. Facilitator: Debbie Nelson-Covington, Dare County Schools

Roundtable for Managers and Supervisors – Presented by: Margery McGill, Johnston County Schools, NCPTA Membership Chair

Roundtable for Technicians (2hrs)– This session is designed for mechanics only. Facilitator: Dusty Hebert, Technician, Johnston County School Transportation

Safe Fleet / Seon Training Session – Learn more about Evidence Manager and Nexus Cloud, the next generation of video Management software and integrated solutions. This session will focus on best practices, navigating new features and general Q/A. Presented by: David Pan

Safety Vision – Product Demo -Safety Vision, along with our partners at Sitestream, will provide insight on how to implement Enforcement Programs for both School Buses and School Zones. This session will cover how violations are flagged, uploaded to a secure cloud, reviewed with all the ticketing services from creation, authorization, issuance and collection. The course will cover all the due process that is afforded to motorist and what is needed to get programs in place and up-n-running. Presenter: Frank Bowden

School Bus Evacuation – Presenter: Montavia Heath, Transportation Director, Hoke County Schools

School Transportation Law and Policy Review – Kevin Harrison, NCDPI

SN – Transportation as a Related Service – Many students who access public school transportation qualify for special education and related services. Some of those students also require transportation as a related service in order to access a free and appropriate public education (FAPE). Transporting students with special needs commonly requires collaboration from varied disciplines and perspectives. Participants will gain an understanding of the legal and technical aspects of transportation as a related service. Presented by: Laurie Ray and Heidi Carico, NCDPI

SN – Ride Ready! – This session will focus on being prepared/mentally and behaviorally to get on the bus. Developing systems and exploring how to teach explicit expectations to students who ride their buses to improve behavior and safety. Presented by: Felicia Goodgion, NCDPI

SN - Ensuring Educational Stability for Children in Foster Care – This interactive session will provide participants with an overview of the ESSA foster care provisions for students, including school of origin transportation requirements. Scenarios will be processed, and participants will be able to ask questions about the challenges they face in these serving students. Presenter: Dr. Yatisha Blythe, NCDPI

SN – Sensory Perception on the Bus – This session will discuss how to help students with sensory perception disorder find a peaceful and comfortable ride on the school bus. . Presented by Carol Bowes, Director, Person County

SN – PSU Panel: Collaborating for Students with Special Needs – Panelist from large, medium, and small public-school units/districts will describe how they collaborate on training, assessing student needs, communication, and problem solving. Ample time will be reserved for questions and answers to promote large group discussion on desired topics. Presenters: Laurie Ray and PSU Representatives

SN - Requirements for Students Experiencing Homelessness - This session will provide participants will an outline of the transportation requirements under Every Student Succeeds Act (ESSA) for students who are experiencing homelessness. Discussion on working with the local homeless liaisons, strategies for providing the most cost-effective transportation services for students to and from school and determining the best interest of a student will also be addressed.
Presenter: Lisa Phillips

SN – Transportation Accommodations for Students with Disabilities, Including Service Animals. This session provides an overview of how school systems can ensure equitable, safe, and legally compliant transportation for students with disabilities. We will examine required accommodation, discuss best practices for collaboration, and support students who use service animals. Attendees will gain practical guidance for developing clear procedures, training transportation personnel, and fostering an inclusive environment that supports all students' access to education. Presented by: Crystal Patrick, NCDPI

SN – A Deep Dive into Transporting Students with Disabilities – In this interactive session participants will be introduced to a variety of resources that support transportation of students with disabilities. Participants will work in groups to explore selected resources and they share takeaways with the larger group. Time will be allotted for a facilitated large group discussion of topics of interest that arise. Presented by: Crystal Patrick and Heidi Carico

Synovia Training Session – Presented by: Micole Davis, Christine Cheek and Eddie Sutton

TD-1 Annual Report – This class will focus on the TD-1 annual report components that come specifically from BSIP and the steps necessary to gather the data.

Presented by, NCDPI

TD-10 Bus Statutes and Inventory Class (TD-10) Parked Bus Jeopardy and Replacement Identification – Presented by Brandon Smith

TD-19 Monthly Report for Directors - Presented by: Brandon Smith

TSA Homeland Security – This session will cover all no-cost programs available for your LEA. The session will also cover general security Awareness for School Transportation. This session is offered twice, see schedule for details. Present by: Jason B. Marino, Transportation Security Inspector, U.S. Department of Homeland Security.

Team Building – Get ready to connect, laugh, and learn as we explore the power of Teamwork in School Transportation! This interactive session will spark ideas to strengthen communication, trust, and collaboration – helping teams build a positive, energized culture that drives safety, efficiency, and great service. Presented by: Carla D. Boulware, Routing Operations, Guilford County Schools.

Technology Overview for Mechanics: Email, APPS, MS Office - This session will cover using your email, downloading and installing APPS and basic MS office programs. Presented by: Amanda Goodwin, Director of Transportation, Edenton-Chowan County Schools

TIMS – Basic Routing Principals Tips and Tricks – Presented by Drew McGomery

TIMS – Batch Fill Data Tricks – Presented by: Drew McGomery, TIMS Project Leader UNC Charlotte Urban Institute. This session will showcase how to import external codes into TIMS for various scenarios. Whether it's lost assignments from promotions, summer school, or some other need. Come see how to make your workflow more efficiently with the use of batch fill.

TIMS – Boundary Refresher – Tips and Tricks

Presented by: Bonnie Aycock-Person, ITRE

TIMS - Bus Routing Competition (Sponsored by Edulog) Thursday 8am to Noon

Are you the best TIMS operator in North Carolina? Come put your Edulog skills to the test versus other bus routers from across the state in the second annual TIMS Bus Routing Competition. Similar to the school bus inspector competition, TIMS operators will be given a bus routing scenario to complete in Edulog, and a winner will be chosen based on the final results of the bus routes created. This competition will require a full array of TIMS skills; from creating new stops, runs and routes, to shifting school bell times, reverse/copying runs, adding double loads to a bus, creating alternate stops for am/pm assignments, using/creating work lists and advanced searches, assigning students to stops, running driver reports, etc.

Must be pre-registered to participate. If more than 12 TIMS Operators are Registered, the final participants will be based on the Entrance Exam Results.

Presented/Hosted by: ITRE/UNCC Staff

TIMS Competition Overview – This session is for Pre-Registered Participants of the TIMS School Bus Routing Competition. Participants will receive an overview of the TIMS Competition and, if needed, complete an Entrance Exam to determine the Final 12 participants for Thursday morning. Pre-Registered Participants will receive additional information during Conference Check-In

TIMS – Infinite Campus (The New PowerSchool) – Presenter: Kevin Hart, ITRE. The TIMS & Infinite Campus session will provide an update on the transition from PowerSchool to Infinite Campus as the North Carolina Statewide Student Information System. This session will show the most recent layout and discuss the general functionality of the Infinite Campus Student Transportation Screen to both communicate Transportation Requests to TIMS and accept backloads of TIMS Bus Stop and Route Information. Class is offered three times

TIMS – Maris Refresher Tips and Tricks -Presented by: Drew McGomery, TIMS Project Leader UNC Charlotte Urban Institute. This session will concentrate on refreshing key Maris skills as well as sharing new tips and tricks to make map edits easier and more efficient.

Presented by: Drew McGomery, UNCC

TIMS – Server Management Presented by: Marc Perez

TIMS – The TIMS ESQL Experience – TIMS ESQL includes google street maps and satellite imagery backgrounds as well as many enhanced search and assignment features to help with daily bus routing. Presented by: Alberto Centurion

TIMS – Transfer Stops and Midday Runs – Presented by Bonnie Aycock-Person. Establishing and Managing Transfer Stops and Mid-Day Runs are among the trickiest components of maintaining Bus Routes in TIMS. This session will provide users the opportunity to better understand, create and insert transfer stops within TIMS. This course will also cover preferred methodologies for setting up and managing irregular Mid-Day Runs.

Tort Claims – Judicial Decision Affecting Local LEAs – A review of the Tort Claims litigation process specific to school-bus cases, including what cases are covered under the NC Tort Claims Act, an emphasis on the discovery process, and what role county personnel play when cases go to trial. A review of any judicial rulings that have come out in the last year that affect Tort Claims school bus-related litigation. Presenter: Shelly Perry, Tort Claims Investigator Supervisor, NCDOJ

Tort Claims Paperwork and Procedures – A review of the process of gathering and completing information after yellow school bus accidents, as well as the role of the tort Claims Investigator Team in processing the matters. A review of various types of situations that may arise and how to handle them and what is needed for our office to assist. Presenter: Shelly Perry, Tort Claims Investigator Supervisor, NCDOJ

Trade Show – Meet the vendors who supply our buses and everything in between. See new and innovative ideas from companies across the nation. Take a stroll through the expo center and meet vendors and discuss transportation needs.

Transportation Director’s Report – Presented by: Kevin Harrison, NCDPI

Transportation Funding and Budget Rating Simulator - Learn the basics of transportation funding as well as how to use the budget rating simulator to look at how changes in operations will impact your funding. Presented by: Kevin Harrison

White's IC Bus – Aftertreatment Diagnostics – Carlos Lopez

White’s IC Bus — Aftertreatment, Introduction and The Future LEAs A- M and LEAs N-Y (see schedule) Presenter: Carlos Lopez

White's IC Bus - Cummins Updates. This is a 2-hour session.

White's IC Bus – Next Gen EC/Lift Diagnostics – Presenter: Carlos Lopez

White's IC Bus – Next Gen Update and Overview – Presenter: Carlos Lopez

White's IC Bus – Trans/Air by Lippert - AC Preventative Maintenance two-hour session. This session provides a practical overview of maintaining air conditioning systems used in school buses. Attendees will learn key preventive maintenance practices, basic system components, and how to identify common issues to ensure reliable performance and passenger comfort. Presented by: Jeff Holbert

Wrecker Training – This session will be held inside the expo center for 30 minutes and outdoors in the Expo Center Parking Lot for remaining 30 minutes.
