

INTRODUCTION

The Retrio Bluetooth Speaker is a self-contained, plug-and-play high-fidelity stereo system designed specifically for Chevrolet Corvairs. Each unit includes everything required for installation under the dash. No cutting, drilling, or permanent modifications to the dash or wiring are required.

INSTALLATION

1. Remove the radio, existing speaker, glove compartment cardboard, and passenger side defroster outlet and hose.
2. Assemble the pivot, screw and ball into the supplied mounting bracket (see Figure 1).
3. Insert speaker under the dash with grill facing upwards and wire harness towards the driver's side.
4. Slide the speaker from the passenger side towards the driver side, underneath the ash tray (see Figure 2).
5. Position the mounting bracket under the speaker with the ball resting in the socket in the speaker enclosure.
6. Fasten the mounting bracket with the two supplied sheet metal screws. Slide speaker left or right to align bracket screws to the vehicle dash.
7. Tighten the pivot and ball assembly to slightly compress the rubber gasket to the underside of the dash.
 - ⚠ **Note:** *DO NOT OVERTIGHTEN*
8. Reinstall defroster outlet and hose, radio, and glovebox cardboard insert.
9. Plug the 3-pin speaker harness into radio. Plug 1-pin connector into vehicle radio wire harness (see Figure 3).

OPERATION

Radio Mode

When the radio is turned on, it operates normally and audio plays through the Retrio speaker.

Bluetooth Mode

When the radio is off, Bluetooth is enabled. Connect to device name starting with XWF-M8-xxxx from your iPhone, Android, or media player. Control the volume from your device.
