

Technical Product Information

Industrial Gear Oil T

Extreme Pressure Industrial Gear Oils

Description	Rev.01_01.03.2019
<p>Industrial Gear Oil T is a range of extreme pressure industrial gear oils designed for use in all designs of industrial gear sets with circulating and splash lubrication. The additives used in the formulation gives good wear protection even under extremes of pressure and shock loading with a high degree of oxidation stability.</p>	<h3>Features / Benefits</h3> <ul style="list-style-type: none">▪ Extreme pressure enhanced▪ Good oxidation resistance▪ Wide range of use▪ Protects against shock loads
<p>Directions for Use</p> <p>May be used in any industrial gear set which calls for the use of an extreme pressure gear oil. They give wear protection to the gears and bearings even under shock loading conditions and provide excellent anti-corrosion properties. All the grades are in accordance with the requirements of leading gearbox manufacturers and AGMA specifications.</p>	

Typical Physical Properties	68	100	150	220	320	460
Viscosity at 40°C	68	100	150	220	320	460
Viscosity at 100°C	8.7	11	15	19	24	31
Flash Point, °C	220	230	240	245	250	265
