# WHERE WE HAVE MADE A DIFFERENCE

The most cost effective promotional item on the market

Made in North America, allowing us to offer a 5 day turnaround

Largest print area in the industry

## Printed balloons used for promotions

- In stores, restaurants and grocery stores where kids will parade their printed balloons...a publicity that will last all day!
- In schools, recreational centers and companies to demonstrate team spirit.
- In dentist and medical clinics where candies have a bad reputation

## Printed balloons used to deliver a message

- In stores to promote sales and special programs (for example: double your points, black Friday Sales).
- In shipping centers to inform clients of an event (for example: a blood drive, a flash sale, a pop-up event).

## Printed balloons used to stand out

- Outdoor use for real estate agencies in order to promote their open-house events
- In car dealerships to offer a festive ambiance
- In booths at tradeshow to get people's attention and drive more traffic
- At sporting events or to promote a fundraising event

## Printed balloons used to celebrate

- Corporate anniversaries and milestone celebrations.

## **BIODEGRADABLE DURABLE & SAFE**

- All our latex balloons are made from natural fibers that are 100% biodegradable
- Latex balloons are NOT plastic
- Latex is harvested by tapping the rubber tree, this process does not harm the trees
- They decompose naturally over time, reducing their impact on the environment
- Our inks are water-based, non-toxic and odorless
- Our balloons and inks comply with European and global toy directives, respectively

## **HELIUM SOLUTIONS & AWARENESS**

- Helium is a colorless, odorless & non-toxic gas
- Helium balloons have different float times based on size, type & environmental conditions - generally :
  - 11" latex balloons float for 10–12 hours
  - 16" latex balloons float for 24–30 hours
  - Foil balloons float for 3–4 days
- To extend float times for latex balloons, ask us about using Ultra Hi-Float
  - Ultra Hi-Float is a biodegradable gel that coats the inside of latex balloons, reducing helium loss and increasing float time by up to 25 times
