## 7 Programmes

You can find an overview of the programmes that can be selected here. Different programmes, which can be found on the control panel of your appliance, are available depending on the appliance configuration. The running time may vary depending on the programme selected. The running time depends on the water temperature, the quantity of tableware, the level of soiling and the Additional function → Page 20 select-

ted. The running time will change if the rinse aid system is switched off or rinse aid needs to be added. The consumption values can be found in the quick reference guide. The consumption values relate to normal conditions and a water hardness of 16 - 20 °E. Different influencing factors such as water temperature or pipe pressure may result in deviations.

Programme	Use	Programme sequence
<b>Chef</b> Chef 70	Tableware: ■ Pots and pans, non-fragile tableware and cutlery Level of soiling: ■ Stubborn, burned or dried-on food remnants containing starch and protein	Intensive: ■ Pre-Rinse ■ Cleaning 70 °C ■ Intermediate rinse ■ Final rinse 65 °C ■ Extra Dry
<b>Auto</b> Auto 45-65°	Tableware: ■ Mixed tableware and cutlery Level of soiling: ■ Common household food remnants lightly dried on	Sensor-controlled: ■ Optimised by sensors depending on the soiling of the washing water.
<b>Eco</b> Eco 50°	Tableware: ■ Mixed tableware and cutlery Level of soiling: ■ Common household food remnants lightly dried on	Most economical programme: ■ Pre-Rinse ■ Cleaning 50 °C ■ Intermediate rinse ■ Final rinse 35 °C ■ Drying
<b>Glass</b> Glass 40°	Tableware: ■ Delicate tableware, cutlery, temperature-sensitive plastics, glasses and stemware Level of soiling: ■ Lightly adhering fresh food remnants	Particularly gentle: ■ Pre-Rinse ■ Cleaning 40 °C ■ Intermediate rinse ■ Final rinse 50 °C ■ Dry

Programme	Use	Programme sequence
<b>Classic</b> Classic 60°	Tableware: ■ Mixed tableware and cutlery Level of soiling: ■ Common household food remnants lightly dried on	Time-optimised: ■ Cleaning 60 °C ■ Intermediate rinse ■ Final rinse 50 °C ■ Dry
<b>Easy Clean</b> Easy Clean	Use only if appliance is unloaded.	Machine Care 70 °C
 <b>Favourite</b>	→ "Favourite ♥", Page 19	

**Note:** The relatively long running time in the Eco 50 ° programme is due to longer soaking and drying times. This results in optimal consumption values.

### 7.1 Information for test institutes

Test institutes are provided with information for comparability tests, e.g. according to EN60436. These are the conditions for conducting the tests, however they are not the results or consumption values. Request by e-mail to: [dishwasher@test-appliances.com](mailto:dishwasher@test-appliances.com) The product number (E-Nr.) and the production number (FD) are required here. They can be found on the rating plate on the appliance door.

### 7.2 Favourite ♥

You can save a combination of a programme and an additional function to the ♥ button. Save the programme via the Home Connect app or on the appliance.

The pre-rinse program is saved to this button at the factory. Pre-rinse is suitable for all types of tableware. The tableware undergoes intermediate cleaning via cold rinsing.

**Tip:** You can use the Home Connect app to download additional programmes and save them to the ♥ button.<sup>1</sup>

#### Save Favourite ♥ on the appliance.

1. Open the appliance door.
  2. Press .
  3. Press the right programme button.
  4. Press the button for the relevant additional function.
  5. Press ♥ for 3 seconds.
- ✓ The selected programme and the additional function will flash.
  - ✓ ♥ flashes.
  - ✓ The programme and the additional function are saved.

**Tip:** To reset the programme to the pre-rinse programme stored at the factory, use the Home Connect app<sup>1</sup> or reset your appliance to the factory settings.
