

Greenline kitchen degreaser

BEYOND THE KITCHEN INTO THE GENERAL LIVING AREA

There is more to the Greenline kitchen degreaser, than just in the name. It is a hard surface floor cleaner for all areas.

Greenline kitchen degreaser can be used for all hard surface floors, such as tiles, vinyl, floating timber floorboards, solid timber and concrete.

Create a **Mop dilution** in a bucket and mop away all grease and grime off the floor. The dilution can be varied to suit the depth of cleaning required. Try a lighter dilution first.

Once applied to the whole floor, follow through wiping it clean with a bucket of fresh water. It is good practise as you clean the floor to change the bucket of water with fresh water to prevent reapplying the dirty water back onto the floor. For a streak free finish, dry off with a towel or let the floor air dry.
