## CAUTION

All Greenline cleaning products are completely safe however a caution has been placed on the label to ensure that you are aware of potential reactions to surfaces and certain types of materials.

To avoid any reaction with the surface, always test the product in an inconspicuous location before using it on the main surface

Note: Greenline multipurpose cleaner is not a window glass cleaner as it has surfactant ingredients that create a soapy, foaming solution to help remove oily matter.

all-natural **Greenline**  
**multipurpose surface cleaner**

# Greenline multipurpose surface cleaner

## DIRECTIONS

All Greenline cleaning products are strong and clean very efficiently and effectively. Generally a light spray across the surface is all that is required. And perhaps an extra spray on a heavy spot if required.

The rear label of all Greenline Cleaning products outline specific cleaning directions for the product to obtain the best cleaning results.

Greenline multipurpose surface cleaner keeps on working to clean the longer it is left on the surface. A quick spray and wipe for a fast and efficient clean or leaving it on the surface between 1-5 minutes in troubled dirty areas of grease and grime, will allow the solution to breakdown and remove light grease and grime revealing a fresh-looking surface. A simple wipe-away with a clean wet absorbent cloth to achieve the cleanest result.
