

Benefits for Health Practitioners

*Improve Clinical Outcomes
Expand Your Practice*

New Tools For Your Clinical Practice:

Difficult clients have jumped from clinic to clinic before they came to you. Their problems are unique and challenging. Using LifeWave products in addition to your standard protocols can make your practice the last place these clients need to go!

Historical Breakthrough in Affordable Stem Cell Technology: Our newest breakthrough product, X39TM, activates GHK-Cu Copper Peptide, which has been clinically proven to:

- Activate Stem Cells
- Accelerate Wound Healing
- Increase Anti-Oxidant Protection
- Support Anti-inflammatory Action
- Increase Collagen
- Promote Blood Vessel Growth
- Reverse Gene Expression to a Healthier State

Patients will typically experience noticeable results within 30-days... and some much faster.

If Pain Or Preparation For Your Therapy Is The Problem:

LifeWave IceWave and Aeon patches will bring instant reductions in inflammation and associated pain levels, allowing you to get to the core problem quickly.

When Stress Or Distress Is A Barrier To Your Protocols:

LifeWave Aeon patches are proven to balance autonomic nervous system function within 10 minutes of application. A client who is in a calm state is much more receptive to your therapy. Aeon also reduces heart rate variability and systemic inflammation at the same fast rate.

Client Homework:

By carrying LifeWave products in your front office, in addition to stem cell activation, your clients can benefit from clinically proven results in the areas of sleep, detoxification, organ function improvement, age reversal, regenerative medicine, pain management, cellular energy enhancement and much more. Many of these may be areas your practice has not been able to offer before now. Your clients will improve on many levels from your offerings. And you'll have no worries about side-effects or contraindications using our non-transdermal phototherapy patches. No drugs or chemicals enter the body.

Good For Your Business:

Satisfied customers don't refer ~ excited customers do! Clinics using and offering LifeWave patch products see their referral rates go up because of the often-stunning health results and subsequent excitement these products bring. Many see retail volume reach into the thousands shortly after introducing them and some say LifeWave products quickly out-sell their best product line by multiples.

Support:

Clinical support and demonstrations are available from your Independent LifeWave Distributor upon request. Clinical trials and scientific reports showing efficacy and safety of LifeWave products are available online. Referrals and references from Practitioners more experienced in the business and clinical benefits of LifeWave products are available upon request.
