2) The X39 Gift of Good Health Flyer

This simple downloadable, 2-color, 2-sided print-at-home flyer clearly outlines X39's benefits, usage instructions and on the back side contains the Health Tracker for recipients to document their before and after results.

If you use this flyer, consider also including the LifeWave X39 Tri Fold Brochure (10 for \$3.50 in your back office store) and possibly one of the Stem Cell article reprints in the Distributor => Resources section of NittyGritty101.

The Gift of Good Health
Activate Your Body's Own Stem Cells
to Help Support a Healthy Immune System

Historical Breakthrough in Affordable Stem Cell Technology

- As we age, our stem cells decline in their ability to heal our bodies.
- Continued use of LifeWave's X39® stem cell activation patches provides the body with a level of health and vitality that many have not experienced in years... possibly decades.
- The secret? An exclusive, patented and proven phototherapy non-transdermal patch technology.
- LifeWave's X39® is the result of over 90 clinical studies and 20 years of research.
- When applied to or near the body, the X39® phototherapy patches are activated by the infra-red light emitted from your body.
- X39® then emits back a very targeted and specific light frequency that is clinically proven to signal the body to elevate GHK-Cu copper peptide.
- GHK-Cu copper peptide has been clinically proven to activate your body's own stem cells.
- LifeWave is the world's first and only company offering this patented approach to activate stem cells.
- All for the cost of a cup of coffee per day!

Typical Health Benefits

- Rapid minor pain relief
- Reduced inflammation
- Better sleep
- Improved energy and vitality
- Enhanced sports performance
- Faster recovery from exercise
- Improved skin appearance
- Improved hair quality
- Rapid wound healing
- Improved mental clarity
- Relief from many other health and age-related issues

How Quickly Do People Experience X39® Benefits?

Millions of genetic differences make you... uniquely you... so everybody's results and speed of results will vary.

- Some Within Minutes... Many Within 24 Hours:** Many experience rapid and noticeable health benefits from stem cell and copper peptide activation... benefits they can feel!

ACTIVATE YOUR BODY'S OWN STEM CELLS WITH LIFEWAVE X39™

What is LifeWave X39™? LifeWave X39™ is a non-invasive, non-transdermal patch technology that activates your body's own stem cells. It is a safe, effective way to help support a healthy immune system and overall health.

How Does LifeWave X39™ Work? LifeWave X39™ uses a combination of phototherapy and copper peptide activation to stimulate your body's own stem cells. The copper peptide activation is triggered by the infra-red light emitted from your body, which activates the copper peptide in the patch, releasing it into your blood stream.

What are the Benefits of LifeWave X39™? LifeWave X39™ has been clinically proven to provide a variety of health benefits, including:

- Improved skin appearance
- Improved hair quality
- Rapid wound healing
- Improved mental clarity
- Relief from many other health and age-related issues

How Long Does it Take to See Results? Millions of genetic differences make you... uniquely you... so everybody's results and speed of results will vary. Some experience rapid and noticeable health benefits from stem cell and copper peptide activation... benefits they can feel! Others need a longer period of time, with our Risk Free 30-Day X39® Trial, everyone will have the opportunity to start experiencing powerful and diverse health benefits of X39®.

Activate Your Stem Cells!
A Safe Way to a Healthier You

Activate Your Stem Cells! Stem cells are the body's natural way of repairing and maintaining itself. They are the building blocks of all tissues and organs, and are responsible for the growth and development of the body. Stem cells are also involved in the repair and regeneration of tissues after injury or damage.

What are the Benefits of Activating Stem Cells? Activating stem cells can help to improve overall health and well-being. Stem cells have the ability to repair and regenerate damaged tissue, and can help to reduce the risk of certain diseases. Activating stem cells can also help to improve the immune system, and can help to reduce the risk of certain types of cancer.

How Can I Activate My Stem Cells? There are several ways to activate stem cells, including:

- Exercise: Regular exercise can help to stimulate stem cell activity in the body.
- Healthy diet: A diet rich in antioxidants and anti-inflammatory foods can help to support stem cell activity.
- Stem cell therapy: Stem cell therapy is a medical procedure that involves injecting stem cells into the body to help repair damaged tissue.

What are the Risks of Activating Stem Cells? There are some risks associated with activating stem cells, including:

- Inflammation: Activating stem cells can cause inflammation, which can lead to pain and discomfort.
- Immune system: Activating stem cells can stimulate the immune system, which can lead to allergic reactions.
- Side effects: Some people may experience side effects, such as fever, chills, and headache.

Conclusion: Activating stem cells is a safe and effective way to improve overall health and well-being. It is important to consult with a healthcare professional before starting any stem cell therapy.
