Our team

At the heart of PJD is our exceptional team of professionals who possess a deep understanding of the lift industry and a passion for delivering outstanding client service.

With a diverse range of backgrounds and expertise, our team combines analytical intelligence with strategic thinking to provide informed advice and execute sophisticated strategies.

Our team of experts are here to provide clarity and understanding in the lift industry, helping our clients navigate complex legislation, technical challenges, and commercial considerations.

With exceptionally high standards, plain-speaking reports, and long-lasting partnerships, we are dedicated to empowering our clients.

Surveys, Audits and Inspections

Lifts are sophisticated devices. If you oversee their management without understanding the lift industry, it may be challenging to determine whether the guidance you receive is accurate, honest, and cost-effective. Our team of experienced lift consultants perform comprehensive inspections of various lifting equipment and provide clear, informative reports that avoid unnecessary technical jargon.

Portfolio management

We will ensure your lifts and escalators operate at peak efficiency with our bespoke maintenance management services. Key Services Include: Maintenance Quality Audits: Assess ongoing maintenance and highlight deficiencies to ensure your service contractor meets their obligations. Custom Maintenance Contracts: Develop contracts tailored to your needs and oversee tendering, contractor selection, and performance management. Ongoing Oversight: Regular reviews, performance assessments, and actionable recommendations to enhance equipment lifespan and efficiency.

Modernisation and Replacement

We provide end-to-end project management services to ensure your lift developments are delivered on time and within budget. What We Offer: Design Phase Services: Identify the most appropriate solutions. We will collaborate closely with you to develop a comprehensive strategy and write an employer's requirements (ER). Pre-Construction Planning: Manage contractor selection, scheduling, and pre-start preparations. manuals to confirm they provide clear instructions for the ongoing care of the lift equipment.

LOLER Examination of Passenger Lifts

We are in partnership with Independent Safety Evaluation (ISE), specialists in professional lift engineering expertise. Since 2008, ISE has delivered engineering risk and compliance solutions to clients across multiple sectors and is widely recognised for its dedicated LOLER examination services within the property management sector. www.iseuk.com

Compliance

Principal Designer Role (CDM 2015) As Principal Designer, we can take control of the pre-construction phase to plan and manage the health, safety and welfare elements of your project. Under The Construction (Design and Management) Regulations (CDM 2015), clients are required to appoint a Principal Designer to plan and manage the health, safety and welfare elements of a project. As the appointed Principal Designer, we work with organisations to plan, manage, monitor and coordinate health and safety in the pre-construction phase of lift and escalator projects. Find out more about the roles and responsibilities of a Principal Designer as told by the Health and Safety Executive (HSE)

Training & Support to the Lift Trade

We can help with ISO accreditation, from drafting documentation to auditing the system.

Safe release of trapped lift passengers training. Also known as lift entrapment and emergency release training, this course is designed for staff who are nominated to carry out the safe release of trapped passengers. It provides the competence to rescue passengers trapped in a lift in accordance with BS7255:2023 Safe Working on Lifts.
