

NUMBOTS

NumBots is an online game.

Playing little and often will significantly improve your child's recall and understanding of number bonds and addition and subtraction facts.

These are critical foundations in maths so we are excited by the impact NumBots will have.

The children have been shown how to login and have brought home a username.

They might need some help navigating to the website and entering the details but once they're in, they just need some quiet space to get on with the games for 5 minutes.

Please ask your child's teacher if they are struggling to login.

Important: please don't allow siblings, friends or family to answer for them but do support your child if they're stuck.

Little and often

In order to get the best out of NumBots children should regularly play for short bursts so we would ask that you give them 5 minutes play each day.

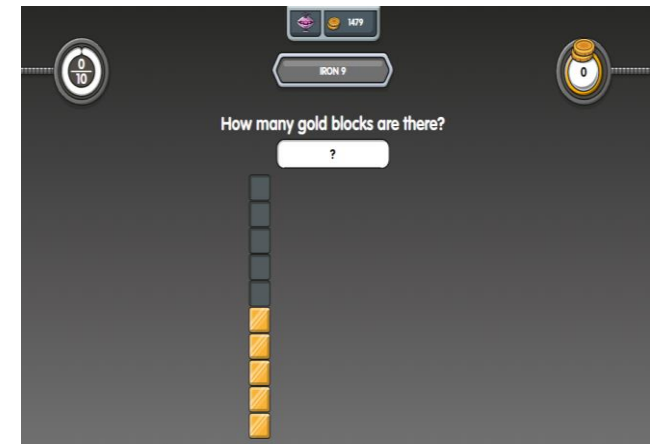

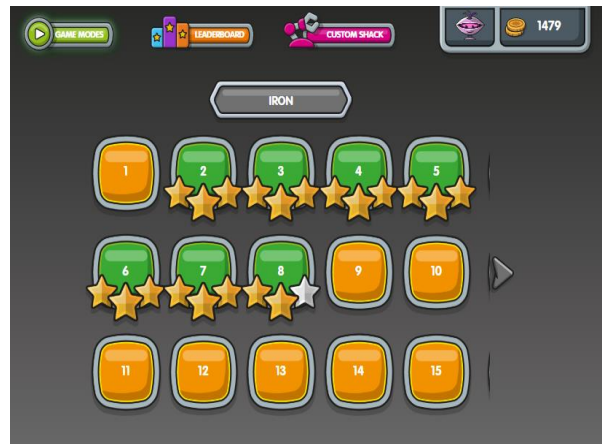

All children start at the same place in Story Mode, and when they get to a certain stage they unlock challenge modes. The idea is that they play little and often, and this will significantly improve their understanding of number bonds and addition and subtraction facts.

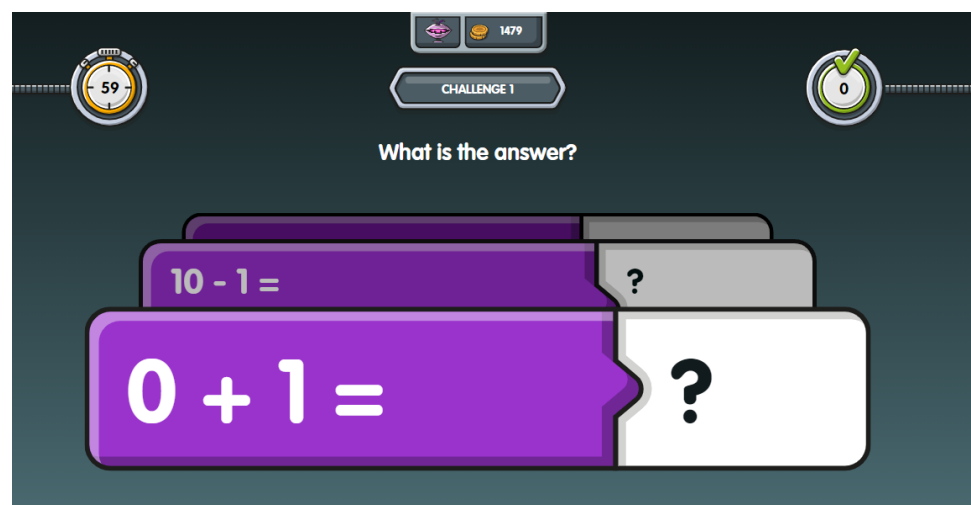

Story Mode – the emphasis is on learning the ideas and concepts behind addition and subtraction so it features more diagrams, shapes and question styles.

Challenge Mode – the emphasis is more on speed of recall of key facts, like number bonds to 10, doubling small numbers or adding & taking away in your head.

Your child will enjoy customising their NumBot in the Custom Shack with the coins they've earned playing.
