

PLAZA GUADALUPE INTERACTIVE PAVILION - WEST

# PLAZA GUADALUPE

## INTERACTIVE PAVILION

MICHAELLA DODD  
JODI PRIESMEYER

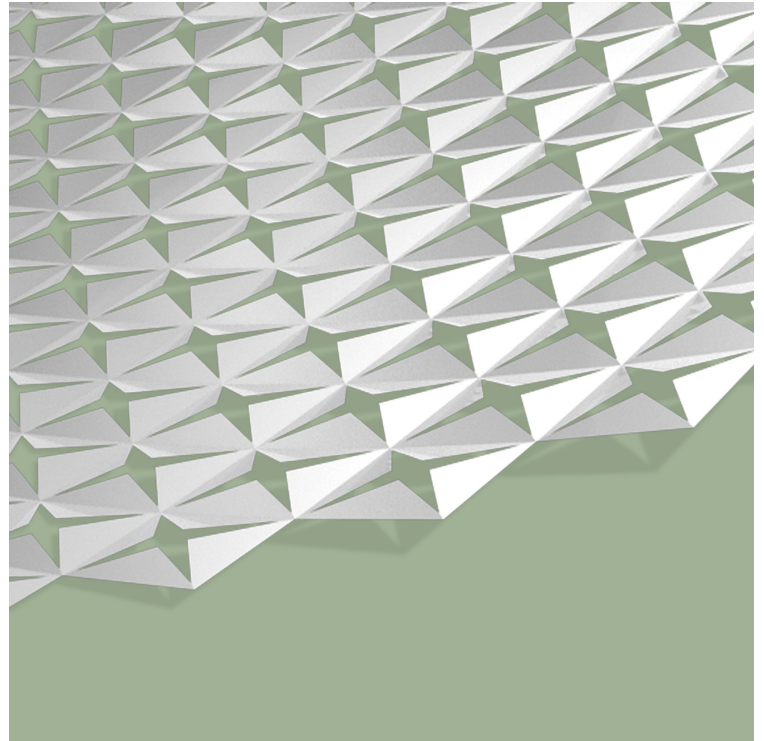

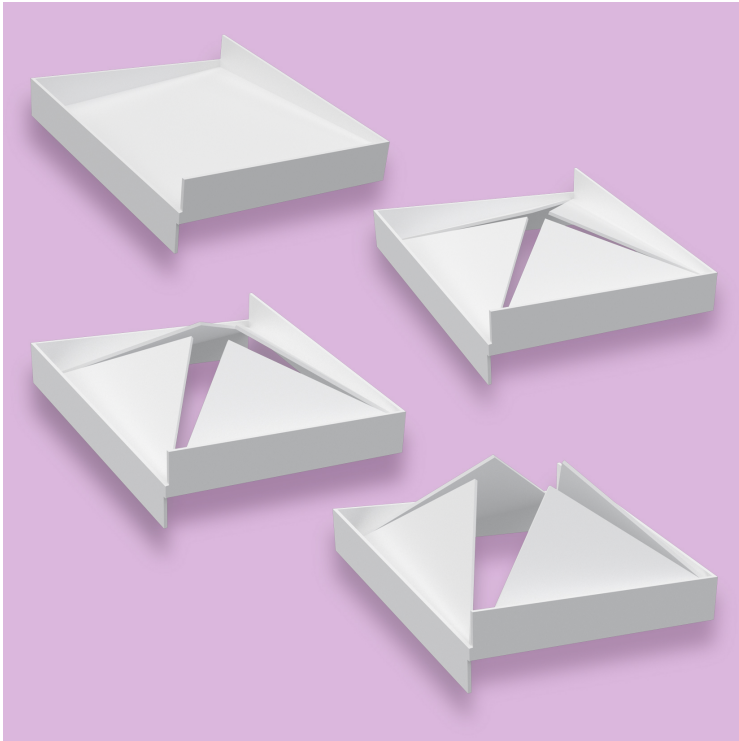

Plaza Guadalupe, in San Antonio's historic westside neighborhood, will be the site of an interactive pavilion built to enhance the city's Fiesta celebrations. The pavilion will provide shade and interaction as the central canopy responds to visitors via motion detection. Square modules will open and close as visitors move through the space, changing the way sunlight filters onto the plaza. The pavilion will celebrate the strong community and generational ties of the westside, and underscore the connectivity we all share.
