

CIMATRON

All-in-One CAD/CAM

Single platform for mold, die, and electrode design, supporting 2.5 to 5-axis machining.

Faster and Efficient

Cuts delivery time by 70%, handles changes easily, and ensures ROI in 6 months.

Flexible Options

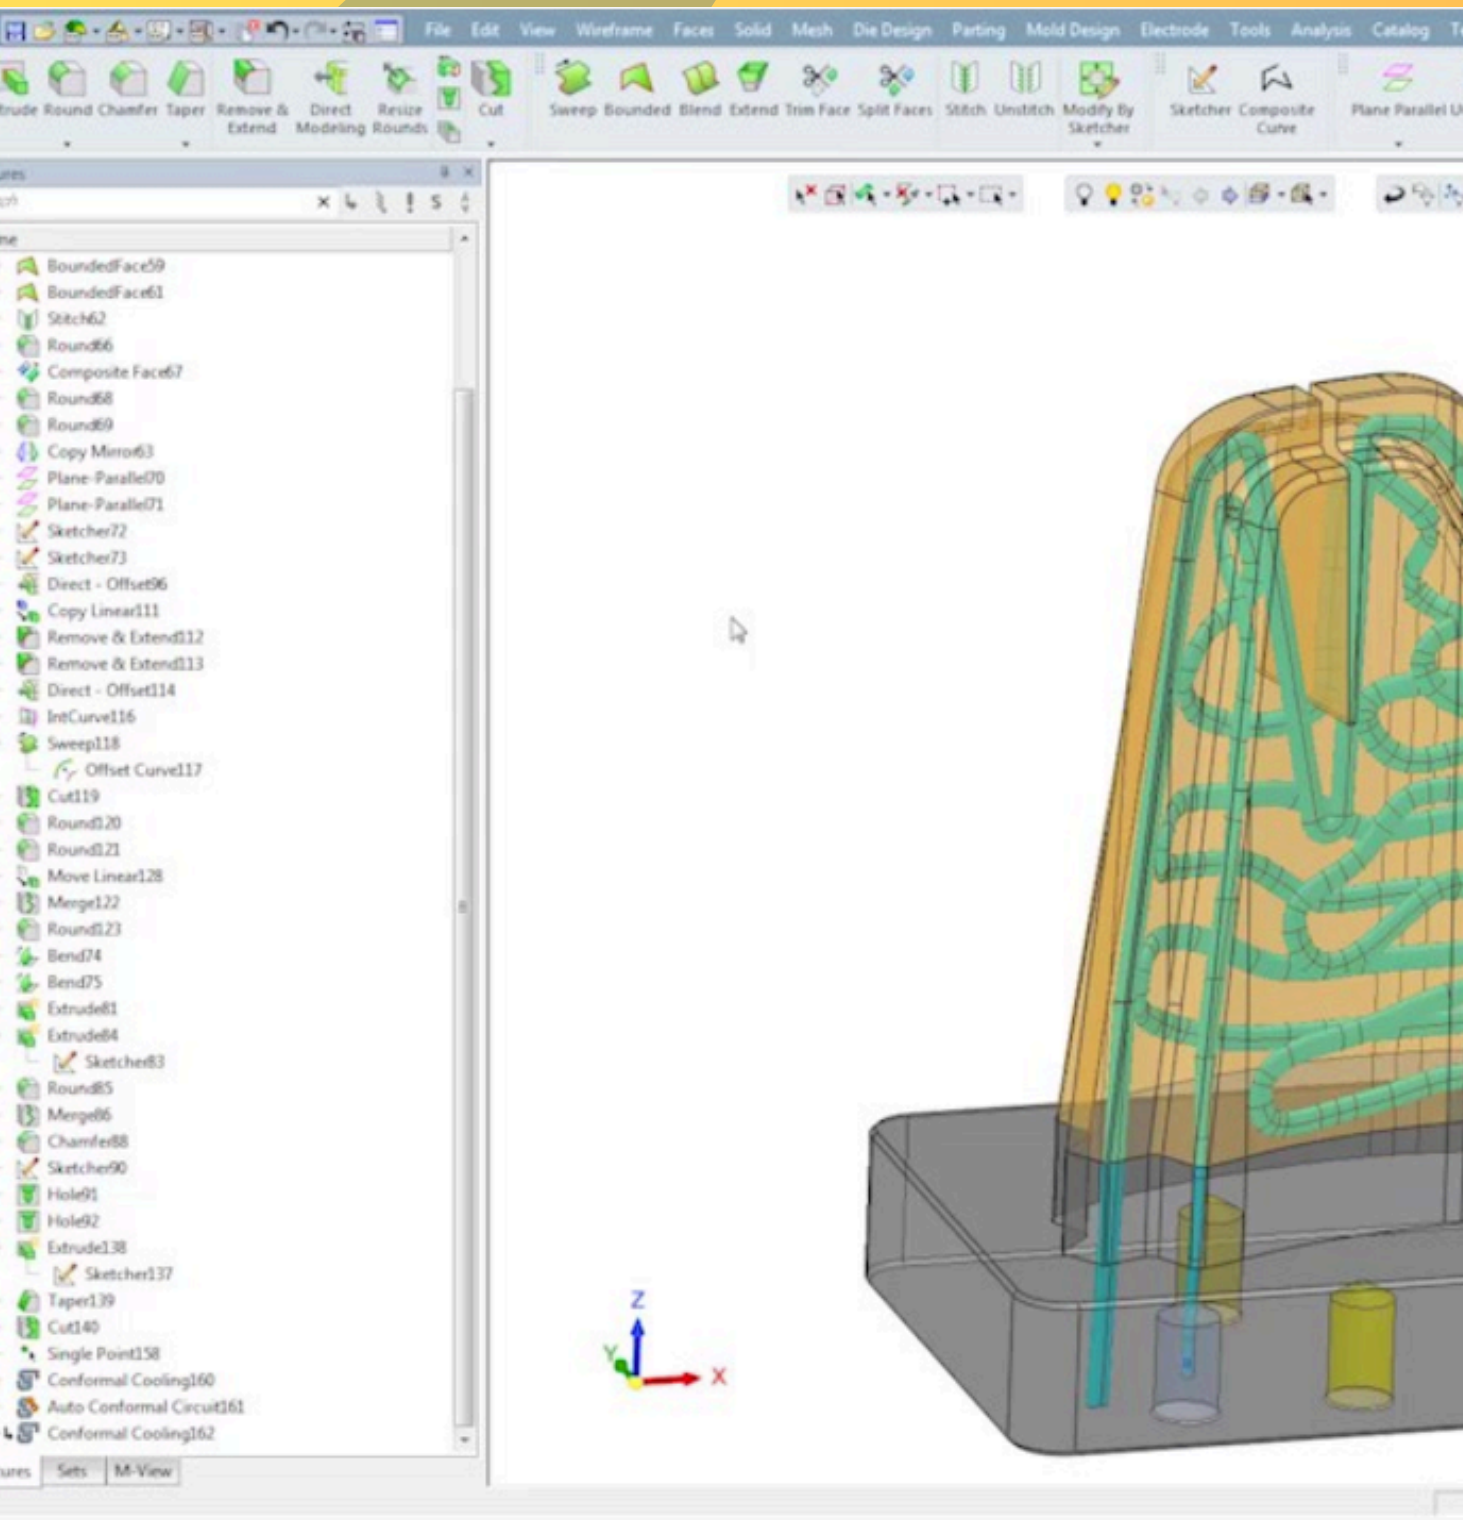

Choose CAD, CAM, or full integration with expert support and training.

Streamlined Workflow

Covers everything from quoting to NC programming with a user-friendly interface.

WHAT'S SPECIAL?

Specialized for Toolmaking

Tailored for mold, die, and electrode design with features like automated cavity/core separation and strip layout tools, making it ideal for precision industries.

Integrated CAD/CAM Solution

Combines design and manufacturing tools in a single platform, ensuring seamless transitions from design to production without data loss.

Advanced Automation Features

Automates repetitive tasks in both design and NC programming, significantly reducing time and improving efficiency.

Wide Compatibility and Scalability

Supports diverse file formats, integrates with various CNC machines, and adapts to the needs of both small shops and large manufacturers.
