

STOP LIME DOWN INDUSTRIAL SOLAR

**DEADLINE 9 JANUARY
NOW IS THE TIME WHEN EVERYONE
CAN PLAY THEIR PART.**

**PART OF THE BELOVED COTSWOLDS IS NOW TARGETED
TO BECOME AN INDUSTRIAL LANDSCAPE OF METAL AND GLASS.**

THIS MATTERS.

**LIME DOWN IS NOT A SMALL SOLAR FARM BUT A GIGANTIC INDUSTRIAL POWER
STATION EXCUSED AS 'GREEN'.**

**Net Zero needs smart renewables, not land hungry mega solar built for investors' profit.
Britain's renewable future does not depend on industrialising its farmland in a
sensitive location like here.**

Stop Lime Down is a demand for integrity and intelligence in how solar is delivered.

**Even if you've commented to the developer earlier this year in the consultations, you must now submit
an official objection to the Planning Inspectorate.**

They recommend to the government whether this project goes ahead.

STOP THE INDUSTRIALISATION OF THE COUNTRYSIDE
