

Outreach lesson review - ***The best thing about the outreach was “that I knew everyone was ok because I could see them and I was happy because they cared about me to keep in touch” Chantelle year 9***

Why I stayed at home:

I stayed at home because we all had to isolate because one of the kids was positive for covid-19 so to keep everyone else safe we closed school and we couldn't go to school so we all had to do education at home on zoom

What did I learn:

The teachers taught us about, Road safety, Maths sums (take away and substructions), maze games in Maths, Spellings and reading where we had to download the books from a free software set up by Aida.
I now can do more multiplications because we practiced it on Xfactor.
I know about road safety.
I know how to connect Zoom and use the safety things.
I know why we celebrate remembrance

Best and worse:

BEST - The lessons were only half an hour, I was in my home and not at school, the lessons was not too hard and I concentrate better and it was fun.

WORSE – Connection problem, waiting for everyone to join, upsetting that some of the teachers couldn't come to Zoom because they were teaching the children at school.

It didn't feel like proper school.

What can be improved:

Try teaching us not at awkward times.
Everyone to learn how to use Zoom.
