

Message from the President

Milford Amateur Radio Club

I awoke today after a night of restless sleep. As most of you know, today would have been our Hamfest. If not for the coronavirus causing us to cancel, the weather today would have been perfect to host our event. Who could have predicted the tumultuous events 2020 has brought us?

Our club, however, has pressed forward with several important milestones. To date, we have added an UHF repeater and upgraded our existing VHF repeater. Both repeaters have added digital C4FM in addition to their analog FM capabilities. Much-needed maintenance was performed at our VHF site. While improvements still need to be performed, our Owensville site is much improved.

Work continues getting our UHF repeater back on-the-air. Should our efforts not be successful at its current site, we plan on co-locating both repeaters at our Owensville location.

If you have not already, please visit CincinnatiHamfest.org to check out our site promoting the 2021 Hamfest. The website also has links to our Twitter and Facebook pages. Please invite others to visit the site, and join the mailing list. Please help spread the word the next time you are on a net, or speaking with another ham. Both vendors and attendees are more likely to attend if there is a lot of interest.

We will have exciting news to report soon on a special event hosted by the club. Information on this special event will soon follow as the details are finalized. Until then everyone take care and stay well.
