## CBD (Cannabidiol) Facial With CBD Infused Products

*The Most Effective Way To Keep Your Skin Healthy During  
Cancer Treatments*

Cancer and its medical treatments are known to affect the molecules in your skin, hair and nails – and some studies even show that dry skin and rashes are more common when your treatments are effective.

But that doesn't mean you have to let cancer take away your radiant, youthful appearance. Diamond Beauty is here to support your holistic health by pampering and nourishing your skin back to radiant health using leading nutrients, including CBD.

### **What Is A Facial?**

A facial is the best way to restore and pamper your skin. It's a multi-step skin treatment that will completely rejuvenate the skin

cells in your face to give a clear, well-hydrated complexion. At Diamond Beauty, we use soothing and skin-nourishing ingredients that not only return your youthful glow, but they give you a sense of ultimate relaxation when you're with us.

Our facials include organic and all-natural ingredients precisely formulated to provide the vitamins, minerals, and natural Omega fatty acids your skin craves most right now. Additionally, we have even infused our facial treatments with CBD oil for your benefit.

### **What Is A CBD Facial?**

Our CBD facial includes all the youth-restoring benefits of a regular facial, except it's infused with CBD, a natural compound that helps your skin repair itself even quicker!

### **What Is CBD?**

CBD stands for cannabidiol and comes from cannabis, but don't worry, it doesn't get you high. In fact, CBD is the non-psychoactive sister of THC and research shows that cannabinoids are essential ingredients for skin health. Your skin contains millions of "endocannabinoid receptors" which regulate everything

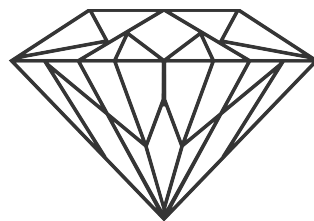

from skin cell reproduction, immune competence and even allergic responses.

You can think of CBD as providing the natural ingredients your skin needs to balance itself and restore its natural health at a cellular level. The best part is that studies show it can also lower inflammation and works to reduce anxiety and pain.

### **Luscious Heavenly Skin Is Only One Facial Away!**

Our Face skin is especially sensitive to changes in your body – that’s why facial skin care treatments are so important, especially for those undergoing cancer treatments. Facials prevent aging, cleanse your skin, and promote blood circulation for a naturally beautiful appearance.
