Contents

Foreword	i
Executive Summary	ii
IBNI-IO SAG Membership	xi
Table of Contents	xii
1. Introduction	1
2. Global Net Zero by 2050	8
2.1 Full Decarbonization of the Global Power Generation Sector is Necessary	9
2.2 Why Nuclear Energy is Needed Under Any 2050 Net Zero Pathway	16
3. Nuclear is Affordable, Reliable, Low Carbon and Safe	18
3.1 Nuclear as a Least Cost Low Carbon Generation Technology	20
Evaluating Nuclear and Renewables Using Value-Adjusted Levelized Cost of Electricity (VALCOE)	21
Capital Investments in Generation Plants and Grid Systems Required to Achieve 2050 Net Zero	38
IBNI to Drive Further Affordability, Cost Reductions and Efficiencies in Nuclear Power	40
3.2 Nuclear is Reliable & Proven for Grid Scale On-Demand Generation	42
3.3 Nuclear Energy Offers Lowest Whole Life Carbon Emission	43
3.4 Nuclear Energy is Amongst the Safest Generation Technologies	45
Fatality Rates Related to Nuclear and Other Power Generation Technologies.....	45
Environmental Issues Related to Nuclear and Other Power Generation Technologies	47
4. Why IBNI is needed to achieve 2050 Net Zero	49
Historical Perspective on the Financing of Nuclear Power Projects and Potential New Structures.....	51
Proposed new IBNI models applicable for Nuclear Power Projects	55
4.1 Current Status of the Nuclear Energy Sector and Nuclear Finance	57
4.2 Critical Leading Roles that IBNI will play in the Nuclear Power Sector	64
4.3 IBNI Will Attract New Sources of Capital for Nuclear Sector Projects	66
Global Capital Markets Investments in IBNI	66
Global Financial Markets Participation in IBNI-Supported Nuclear Projects.....	67
4.4 IBNI and Sustainable Investment Criteria	69

5. IBNI Standards & Criteria	72
5.1 Need for Universal Nuclear-Specific International Standards and Criteria	84
5.2 How IBNI Will Administer and Enforce Standards and Conditions	86
6. Proposed IBNI Capitalization and Governance Structure	88
6.1 Proposed IBNI Capitalization and Membership/Shareholding Plan	90
6.2 Proposed IBNI Governance and Management Plan	92
7. Proposed IBNI Operational Plans and Programs	95
7.1 Proposed IBNI Ordinary Operations Plans and Programs	96
7.2 Proposed IBNI Special Operations Plans and Programs	104
8. Proposed IBNI 2050 Global Impact Targets and Goals	110
8.1 Proposed IBNI 2050 Global Emissions & Sustainability Targets and Goals	116
8.2 Proposed IBNI 2050 Global Nuclear Energy Targets and Goals	118
8.3 Proposed IBNI 2050 Key Financial Metrics Targets and Goals	123
9. IBNI Action Plan and Time Frame	126
9.1 IBNI Implementation Organization (IBNI-IO) Action Plan	127
9.2 IBNI Action Plan	129
Abbreviations and Acronyms	131
References	135
