

LONE STAR MEDICAL

ALLERGY TESTING & IMMUNOTHERAPY

Allergy Testing is a diagnostic procedure performed on patients suspected of having allergies. We perform a skin prick test for over 150 common allergens.

1 COVERED BY INSURANCE

2 PROVIDES LASTING ALLERGY RELIEF

3 REDUCES NEED FOR MEDICATION

SKIN PRICK TEST

Supervised by a doctor, an allergy technician will perform the test using small plastic skin pricks to slightly scratch the surface of the skin on the back.

RESULTS

The diagnostic test will rule out 150 common allergens including grasses, molds, trees, weeds, dust mites, insects, pets, livestock and common food.

IMMUNOTHERAPY

Immunotherapy injections will be administered in our office for allergens testing positive. A series of serum injections are given over a period of weeks to months.
