## Clinical Center

### Secretary of State Hillary Rodham Clinton visits Clinical Center

Secretary of State Hillary Rodham Clinton called for a renewed push for an “AIDS-free generation” in a November speech in the Clinical Center’s Masur Auditorium, marking 30 years of the fight against HIV/AIDS.

“The goal of an AIDS-free generation is ambitious, but it is possible,” Clinton said, emphasizing the use of scientific advances to stem the pandemic.

“We need to let science guide our efforts,” she told the packed crowd of scientists, administrators, and State Department and Department of Health and Human Services officials.

Clinton emphasized using a variety of tools in a “combination prevention” strategy as the most effective way to combat HIV/AIDS nationally and globally, with the focus on three key interventions: ending mother-to-child transmission, expanding voluntary medical male circumcision, and scaling up treatment of people living with HIV/AIDS.

“None of the interventions can create an AIDS-free generation by itself,” she said. “But used in combination with each other and with other powerful prevention methods, they present an extraordinary opportunity.”

Secretary of State Hillary Clinton (fourth, from left) met with (from left) Dr. John I. Gallin, CC director; Dr. Nora D. Volkow, NIDA director; Dr. Harold Varmus, NCI director; Dr. Anthony S. Fauci, NIAID director; and Dr. Francis S. Collins, NIH director, prior to her talk calling for a renewed push for an “AIDS-free generation,” in the Clinical Center’s Masur Auditorium on November 8.

## CHAPTER ONE

### A Scientist at Sea

The pounding on the door of our boat-dock home located on Jamestown Way in Oxnard began at about 5:00 a.m. on November 9, 2011.

#### Controversial CFS Researcher Arrested and Jailed: By [Jon Cohen](#) Nov. 19, 2011

Sheriffs in Ventura County, California, arrested Mikovits yesterday on [felony charges](#) that she is a fugitive from justice. She is being held at the [Todd Road Jail in Santa Paula](#) without bail. But *ScienceInsider* could obtain only sketchy details about the specific charges against her. The Ventura County sheriff's office told *ScienceInsider* that it had no available details about the charges and was acting upon a warrant issued by Washoe County in Nevada. A spokesperson for the Washoe County Sheriff's Office told *ScienceInsider* that it did not issue the warrant, nor did the Reno or Sparks police department. He said it could be from one of several federal agencies in Washoe County.

Why? Because in 1991 ONE million Americans were Infected with HIV in 2010 when studies showed between 10-25 Million Americans were infected with XMRVs which likely got into humans via contaminated blood and vaccines

The Queen thought she had Check-mate, **KING JESUS** had another move !

If my people , who are called by my name, will humble themselves,  
pray & seek my face & turn from their wicked ways, then I hear from heaven,  
and I will forgive their Sin and will heal their land (2 Chronicles 7:14)

COMMENTARY

## Fake Science: XMRV, COVID-19, and the Toxic Legacy of Dr. Judy Mikovits

Stuart J.D. Neil<sup>1</sup> and Edward M. Campbell<sup>2</sup>

### Abstract

One cannot spend >5 min on social media at the moment without finding a link to some conspiracy theory or other regarding the origin of SARS-CoV2, the coronavirus responsible for the COVID-19 pandemic. From the virus being deliberately released as a bioweapon to pharmaceutical companies blocking the trials of natural remedies to boost their dangerous drugs and vaccines, the Internet is rife with far-fetched rumors. And predictably, now that the first immunization trials have started, the antivaccine lobby has latched on to most of them. In the last week, the trailer for a new “bombshell documentary” *Plandemic* has been doing the rounds, gaining notoriety for being repeatedly removed from YouTube and Facebook. We usually would not pay much heed to such things, but for retrovirologists like us, the name associated with these claims is unfortunately too familiar: Dr. Judy Mikovits.

Combination therapy for prostate cancer using botanical compositions and bicalutamide  
WO 2012061790 A1

## ABSTRACT

Botanical compositions comprising non-alcoholic organic extracts of *Canadema lucidum*, *Salvia miltiorrhiza*, and *Scutellaria barbata* for use in conjunction with bicalutamide therapy for cancer therapy, are provided. Methods for treatment or therapy of prostate cancer in a human is provided, the method comprising: administering an effective amount of a botanical composition that is effective for reducing androgen receptor protein expression; and administering concurrently an effective amount of a compound having anti-androgen activity, wherein the concurrent administration of the compound and the botanical composition achieves a therapeutic effect that is more effective than either agent alone.

## Functional characterization of nutraceuticals using spectral clustering: Centrality of caveolae-mediated endocytosis for management of nitric oxide and vitamin D deficiencies and atherosclerosis

Anton Franz Fliri\* and Shama Kajiji

Emergent System Analytics LLC, Clinton, CT, United States

It is well recognized that redox imbalance, nitric oxide (NO), and vitamin D deficiencies increase risk of cardiovascular, metabolic, and infectious diseases. However, clinical studies assessing efficacy of NO and vitamin supplementation have failed to produce unambiguous efficacy outcomes suggesting that the understanding of the pharmacologies involved is incomplete. This raises the need for using systems pharmacology tools to better understand cause-effect relationships at biological systems level. We describe the use of spectral clustering methodology to analyze protein network interactions affected by a complex nutraceutical, Card Miracle (CM), that contains arginine, citrulline, vitamin D, and antioxidants. This examination revealed that interactions between protein network affected by these substances modulate functions of a network protein complexes regulating caveolae-mediated endocytosis (CME), TGFβ activity, vitamin D efficacy and host defense systems. Identification of this regulatory scheme and the working of embedded reciprocal feedback loops has significant implications for treatment of vitamin deficiencies, atherosclerosis, metabolic and infectious diseases such as COVID-19.

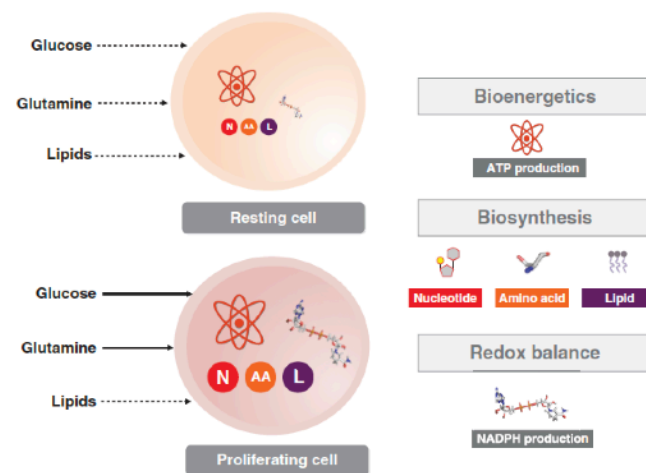

FIGURE 4

Caveola mediated endocytosis (CME) modulates activities of a reciprocal feedback loops that finetunes ROS production, TGFβ activity, Nitric oxide levels and Calcitriol production.

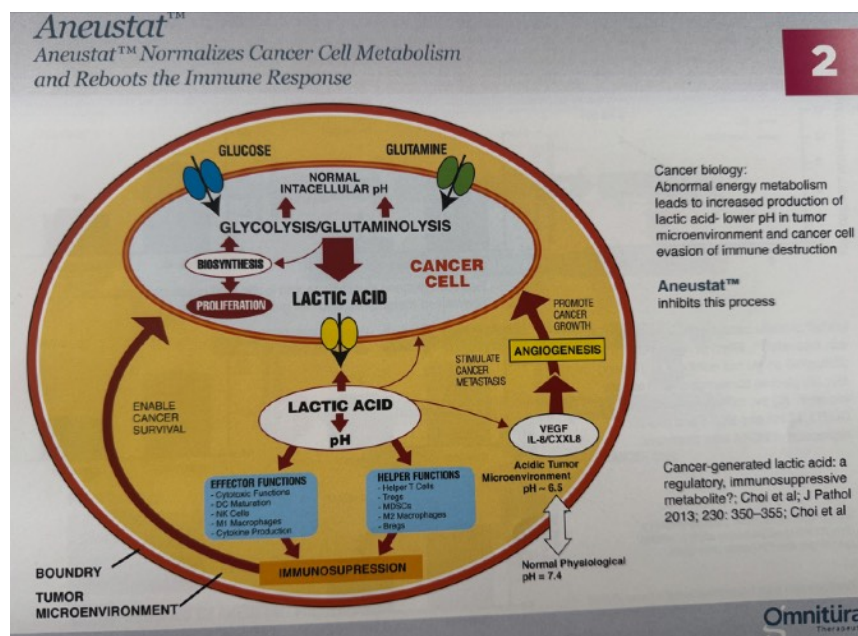

**Figure 1.** Metabolism: resting versus proliferating cells. Normal resting cells use a catabolic metabolism to satisfy the energetic requirements of homeostasis. This demand is met through fatty acid oxidation and the oxidative metabolism of glucose. Proliferating cells, however, must rewire their metabolic program to not only meet various energetic requirements, but to also satisfy the anabolic demands of macromolecular biosynthesis [nucleotides, lipids, and proteins], as well as the maintenance of redox homeostasis. Upon growth factor-mediated stimulation, proliferating cells increase their uptake of glucose and glutamine, which are the 2 primary substrates that fuel cell growth. Solid lines are indicative of increased cellular uptake.

**Figure 2.** Hypoxic rewiring of metabolism. While aerobic proliferating cells use glucose and glutamine for biomass production through the TCA cycle, hypoxic cells shunt glucose to lactate and rewire glutamine metabolism. Glutamine can be used to drive the TCA cycle independently of glucose or contribute to lipid synthesis via IDH-mediated reductive carboxylation of ketoglutarate generated from glutamine.

# EXPRESSION OF **M**anufactured SYNCYTIN IN COVID vaccines expected to result in female infertility and the Development of **C**ANCER

## Head of Pfizer Research: Covid Vaccine is Female Sterilization

Health & Money News / December 2, 2020 / News

The vaccine contains a **spike protein (see image) called syncytin-1**, vital for the formation of human placenta in women. If the vaccine works so that we form an immune response AGAINST the spike protein, we are also **training the female body to attack syncytin-1**, which could lead to infertility in women of an unspecified duration.

Syncytin expressed from HERV required for **placenta** formation in mammals  
part of the Spike Protein expected to make Antibodies

Pfizer filed for Emergency Approval, December 2020

## An endogenous retroviral envelope syncytin and its cognate receptor identified in the viviparous placental *Mabuya* lizard

Edited by R. Michael Roberts, University of Missouri-Columbia, Columbia, MO, and approved October 26, 2017 (received for review August 23, 2017)

### Significance

Retroviral envelope gene capture and exaptation for a placental function has been demonstrated in mammals. Remarkably, placental structures have also emerged on rare occasions in nonmammalian vertebrates, resulting in related modes of reproduction. The *Mabuya* lizard, which emerged 25 Mya, possesses a placenta closely related to that of mammals. Here, we identified a specific retroviral envelope gene capture that shows all the characteristic features of a bona fide mammalian syncytin, being conserved in *Mabuya* evolution, expressed in the placenta, and fusogenic. Together with the present identification of its cognate receptor, these results show that syncytin capture is not restricted to mammals and is likely to be a major driving force for placenta emergence.

- The vaccinations are expected to produce antibodies against spike proteins of SARS-CoV-2. However, spike proteins also contain **syncytin-homologous proteins**, which are essential for the formation of the placenta in mammals such as humans. It must be absolutely ruled out that a vaccine against SARS-CoV-2 could trigger an immune reaction against syncytin-1, as otherwise **infertility of indefinite duration could result in vaccinated women**.
- The mRNA vaccines from BioNTech/Pfizer contain **polyethylene glycol (PEG)**. 70% of people develop antibodies against this substance – this means that many people can develop allergic, potentially fatal reactions to the vaccination.
- The much too short duration of the study does **not allow a realistic estimation of the late effects**. Nevertheless, BioNTech/Pfizer apparently submitted an application for emergency approval on December 1, 2020.
